

Dason Extends Its Solenoid Manufacturing Line with Custom and Door Lock Models

Dason focuses on the line of DC power, custom solenoids and solenoid door locks for various uses.

Dongguan, Guangdong Sep 2, 2026 ([IssueWire.com](https://www.issuewire.com)) - *Dason focuses on the line of DC power, custom solenoids and solenoid door locks for various uses. The combination of product development and manufacturing services enables Dason to address diverse industrial needs.*

Dason presents its expanding portfolio of solenoid products used for controlling the electromagnetic motion. Dason produces such solenoids as push-pull solenoids, open frame solenoids, solenoid valves, and door solenoids. This enables Dason to offer its clients various options depending on equipment and application needs.

As an experienced [Solenoid Manufacturer](#), Dason produces solenoid products in various voltages, powers, sizes, and constructions. Dason supplies its customers with custom solenoids to satisfy equipment needs and standard products to be used in battery equipment, automotive parts, and access systems.

The line of Dason [Solenoid Door Lock](#) consists of compact solenoids with various electrical specifications and constructions. Customers can choose from stainless steel and low-carbon steel products.

As noted by a spokesperson, *"Specifications vary from application to application, and we try to manufacture and develop our products considering those needs and requirements for voltage, size, power, and operation."*

Dason also offers solenoid valve products for air, water, and other fluid control requirements. It offers two-way and three-way solenoid valves in various voltage and construction types.

The company conducts its production and research and development processes in Dongguan, Guangdong, China. Founded in 2012, Dason says it has a management system and a dedicated team for design and research purposes.

Dason has also obtained the ISO9001 quality system due to its concentration on quality management in its manufacturing process.

According to a senior representative of the company, *"Our product line keeps growing with various application requirements, and we endeavor to offer our reliable solenoid products along with proper specifications."*

About the Company: Dason is a solenoid manufacturer located in Dongguan, Guangdong, China. It develops and manufactures its push-pull solenoids, custom solenoids, solenoid valves, and solenoid door locks, among others.
