

East Goscote Electrics Limited Offers Solar Panel and EV Charging Solutions Across Leicestershire

East Goscote Electrics Limited offers solar panel and EV charging solutions across Leicestershire, supporting homes and businesses with professional installation.

Leicester, Leicestershire Sep 22, 2026 ([IssueWire.com](https://www.IssueWire.com)) - East Goscote Electrics Limited is supporting homeowners and businesses across Leicestershire with professional solar panel and EV charging solutions as more properties look at practical ways to manage energy use and prepare for electric transport.

The Leicester-based electrical contractor provides solar PV installation for domestic and commercial properties, alongside battery storage options designed to help customers make greater use of the electricity generated by their systems. For property owners considering [solar panel installation in Leicester](#), the company assesses factors such as available roof space, energy requirements and the suitability of the property before recommending an appropriate solution.

As an MCS-accredited contractor, East Goscote Electrics Limited provides professional guidance throughout the solar installation process. The company also offers ongoing support to help customers understand how their system operates and how solar generation can fit into their wider energy requirements.

Alongside solar PV, East Goscote Electrics Limited supplies and installs EV charging points for homes, workplaces and commercial properties. Customers looking for [EV charger installation in Leicester](#) can discuss their charging requirements, existing electrical setup and future vehicle needs with the company before installation work begins.

Bringing solar panels and EV charging together can also give property owners an opportunity to consider their electricity generation and vehicle charging requirements as part of a broader energy strategy. Rather than approaching the technologies separately, customers can discuss their electrical infrastructure and future requirements with an experienced electrical contractor.

East Goscote Electrics Limited has been providing electrical services to customers in Leicester and surrounding areas for more than 40 years. Its wider expertise in domestic and commercial electrical work enables the company to assess the electrical considerations that may form part of solar PV and EV charger installations.

With electric vehicles and renewable energy technologies becoming a more familiar part of homes and workplaces, the company continues to develop its services around changing customer requirements across Leicestershire.

Customers considering solar panels, battery storage or EV charging can speak with East Goscote Electrics Limited to discuss the requirements of their property and the solutions available.
