

Electric Golf Carts for Commercial Use: Key Specifications Buyers Should Know

Saint Petersburg, Florida Sep 20, 2026 ([Issuewire.com](https://www.issuewire.com)) - [Electric Golf Carts](#) are no longer used only on golf courses. Today, they are widely applied in resorts, hotels, gated communities, industrial parks, campuses, and rental fleets.

For B2B buyers, choosing the right electric [Golf Cart](#) is mainly about specifications, durability, and long-

term operating cost, rather than appearance alone.

- Power System: 48V vs 72V

48V systems are suitable for standard flat terrain and light-duty applications.

72V systems provide higher torque, better climbing ability, and longer driving range, making them ideal for commercial fleets and Middle East applications.

Lithium battery configurations are increasingly preferred due to longer lifespan, lighter weight, and lower maintenance.

- Seating Capacity and Application

2–4 seaters: Golf courses, private communities

6–8 seaters: Resorts, hotels, shuttle services

Utility and cargo versions: Industrial parks, warehouses, maintenance use

Selecting the correct seating layout helps improve efficiency and reduces unnecessary costs.

- Chassis and Suspension

Commercial users should pay attention to:

Reinforced steel chassis

Independent front suspension (optional)

Heavy-duty rear axle for higher load capacity

These features are especially important for high-temperature regions and uneven road conditions.

- Optional Configurations

Depending on market requirements, [Electric Golf Carts](#) can be equipped with:

LED lighting kits (for street-legal use)

Seat belts, mirrors, and windshields

Aluminum wheels and off-road tires

Enclosures and weather protection

- Packaging and Export

For overseas shipment, [Golf Carts](#) are usually packed in steel frames or CKD/SKD condition to optimize container space and reduce freight costs.

Conclusion

For B2B buyers, the best electric golf cart is the one that matches local regulations, operating environment, and usage frequency.
