

Instant Books Publisher Opens New Opportunities for Authors With Comprehensive Publishing Services

INSTANT BOOKS
— PUBLISHER —

New York City, New York Sep 8, 2026 (Issuewire.com) - Writing a book is hard enough on its own. Turning that manuscript into an actual published book, one that readers can hold, download, or listen to, is a completely different challenge. The process involves a long list of steps that most authors never think about until they're already in the middle of them. Editing, cover design, formatting, ISBN registration, retailer preparation, and marketing are the key areas Instant Books Publisher handles for its authors.

The company typically works with two kinds of clients. The first are beginners who have little to no understanding of how publishing actually works. The second are authors who have already published a book before, but didn't have a good experience doing it. Both groups get the exact same level of service: hands-on collaboration with a team that actually does the work, rather than simply handing over a checklist and leaving the author to figure it out alone.

Here's roughly how the process unfolds. First, the manuscript goes through careful editing, where an editor corrects grammar and style issues, tightens up sections that run too long, and checks that the story or content stays consistent from start to finish. Next comes design. A cover is created to match the book's specific genre, and the interior is formatted properly so it looks polished whether it's printed or read on a phone. After that comes a stage most authors have no idea how to handle on their own: registering an ISBN, preparing the correct files for Amazon, Apple Books, and any other retailers the author wants to sell through, and actually getting the book published. Marketing comes last, and it's tailored to the book itself, since a thriller and a children's book need very different marketing approaches and shouldn't be treated the same way.

The author owns the book. All of it. The content, the rights, and every dollar it earns. That's not a small detail; it's the whole point. No one at Instant Books Publisher makes a decision about cover design or editing without checking with the author first, and nothing moves forward without their approval. On top of that, service pricing doesn't change after the first three weeks, which isn't something authors can always count on in this industry.

There's no genre the team hasn't worked with. Some authors come in wanting just one piece of the puzzle, maybe a cover or an edit of their own manuscript. Others show up with a rough draft and want someone to take it all the way through, from editing to launch. Timelines shift from project to project, though honestly, a lot of it comes down to how quickly the author reviews and approves each stage, since the process only moves as fast as the person driving it.

About Instant Books Publisher
