

MC Prime Participates in Wiki Finance Expo Hong Kong 2026 and Receives “Excellent CFD Broker” Award

The financial technology platform showcases its trading infrastructure and liquidity capabilities at the Hong Kong event, highlighting its MT4-based system and diversified CFD asset environment.

Limassol, Cyprus Sep 11, 2026 ([Issuewire.com](https://www.issuewire.com)) - MC Prime, a global financial technology platform, participated in **Wiki Finance Expo Hong Kong 2026**, where the company announced that it received the “**Excellent Broker**” award. The recognition highlighted the platform’s service quality, security systems, and financial infrastructure.

Wiki Finance Expo Hong Kong 2026 brought together financial institutions, fintech companies, and global investors. During the event, MC Prime engaged with participants and presented its core platform infrastructure and liquidity connectivity capabilities to institutional and individual attendees.

The company also showcased a diversified asset analysis environment designed to support users in responding to volatile market conditions. Its offering includes real-time data for precious metals such as gold (XAU/USD) and silver (XAG/USD), a range of CFD assets including global stock indices and commodities, and technical analysis tools for major currency pairs.

MC Prime’s trading environment is built around the **MT4 (MetaTrader 4)** platform. According to the company, its optimized server network supports low-latency data processing, while the platform also supports Expert Advisors (EAs) and various technical indicators. The company further states that systems for segregating customer funds are in operation in accordance with international security

standards.

A representative of MC Prime said the award at Wiki Finance Expo reflects international recognition of the company's infrastructure and technology capabilities. The representative added that MC Prime plans to continue expanding its technology investment based on Asian financial markets while providing global users with more transparent and advanced trading technology solutions.
