

MotoAssure Admin Reviews Show Strong Customer Satisfaction and an A- BBB Rating

Chandler, Arizona Sep 29, 2026 ([Issuewire.com](https://www.issuewire.com)) - MotoAssure Administration, a vehicle protection plan administrator serving drivers nationwide, continues to earn strong marks from customers, according to newly reviewed data from the Better Business Bureau and Google. The company holds a B+ BBB rating, has maintained BBB accreditation since January 2024, and carries a 4.34 out of 5 average across 90 customer reviews on the BBB platform. On Google, [MotoAssure Admin reviews](#) currently average 4.5 out of 5.

The scores reflect a consistent pattern of customers reporting straightforward, well-documented claims experiences with the company. One BBB reviewer noted that MotoAssure Administration paid for a significant repair, saying, "As long as it is stated in your policy, they will pay for it." Another longtime policyholder wrote that the coverage "has come in handy so many times," adding that claims typically involved "only a small deductible."

Vehicle protection plans have become a bigger part of car ownership as drivers hold onto vehicles longer and face rising repair costs. Whether someone is comparing a vehicle protection plan to a used car warranty quote after buying a higher-mileage vehicle or comparing and researching high-mileage extended warranty cost estimates against vehicle protection plan estimates before a major trip, having a

clear picture of what a provider actually pays out matters as much as the plan's price.

MotoAssure Administration offers coverage tiers built to match different ownership situations, including Platinum, Gold, Powertrain, and Prepaid Maintenance plans, serving everything from newer vehicles to older, higher-mileage cars that no longer qualify for factory coverage, a gap that has driven interest in options like vehicle protection plans that can be comparable to extended warranty for high-mileage cars. The company also offers coverage frequently searched for by owners of specific makes, including a Honda vehicle protection plan and broader Honda coverage plans.

BBB accreditation, combined with a review average above 4 stars on two separate platforms, is a meaningful signal in a category where consumers are often wary of vehicle protection plans or extended warranty providers. MotoAssure Administration's current standing reflects consistent customer trust and satisfaction, a distinction that carries particular weight for shoppers comparing multiple providers before choosing a plan and deciding where to place their business.
