

N-iTUS to Showcase Next-Generation Broadband Solutions at Network X 2026 in Vienna

Korean Network Equipment Specialist to Operate a Dedicated Booth and Expand Global Partnerships Across Europe, North America and the Middle East

Gupo-si, Gyeonggi-do Sep 9, 2026 ([IssueWire.com](https://www.issuewire.com)) - N-iTUS Co., Ltd., a Korean network equipment specialist, will showcase its optical communications and broadband solutions at Network X 2026 in Vienna, Austria, this October.

N-iTUS will operate a dedicated booth at the exhibition, presenting access network and industrial networking solutions to telecommunications operators, internet service providers (ISPs), system integrators and network technology companies.

The company will showcase solutions spanning FTTH, XGS-PON, G.fast, industrial Ethernet and Multi-Gigabit Ethernet, addressing the evolving connectivity requirements of telecom and enterprise networks.

N-iTUS is participating in Network X 2026 as a member company of the KT Consortium, as part of the “Optical Communications Components Demonstration Support Program for Intelligent Information Networks” conducted by the Ministry of Science and ICT (MSIT) and The National Information Society Agency (NIA), an AI and ICT policy implementation agency under South Korea’s Ministry of Science and ICT.

Key Solutions

Products on display will include:

- GPON OLTs and ONTs
- DIN Rail GPON ONTs
- XGS-PON ONTs
- G.fast CPE

- VDSL2 solutions
- 2.5G Multi-Gigabit Ethernet switches
- Managed, Industrial and PoE Ethernet switches
- FTTH access and network management solutions

N-iTUS is also expanding into industrial networking and utility applications. Its DG3A DIN Rail GPON ONT is designed for applications including smart metering, smart grids, energy management systems and industrial IoT.

Expanding Global Partnerships

N-iTUS has been strengthening its presence in the European market through major industry events and ongoing technical cooperation with telecom operators and business partners.

Following its participation in ANGACOM 2026 in Cologne, Germany, N-iTUS has continued product validation and technical discussions with European customers and partners.

At Network X 2026, the company plans to identify new customers and strategic partners across Europe, North America, the UK and the Middle East.

“N-iTUS sees Network X 2026 as an important opportunity to demonstrate our technology and product capabilities to the global market,” said a company representative.

“Based on our technology experience in Korea and our participation in the NIA demonstration support program, we plan to continue expanding our business across global markets. We also look forward to developing new cooperation opportunities with telecommunications and industrial customers worldwide.”

About N-iTUS

N-iTUS Co., Ltd. is a Korean network equipment company specializing in FTTH OLT/ONT, XGS-PON, G.fast, VDSL2 and Multi-Gigabit Ethernet solutions for telecommunications operators and enterprise customers.

The company develops broadband access and networking solutions and is expanding its portfolio into industrial networking and utility markets to address the diverse requirements of international customers.
