

Neovyn and Find Inc. Unveil 'Findmymarket' AI Platform, Announcing Strategic Partnership and South Asia Deployment

Singapore, Singapore Sep 16, 2026 ([Issuewire.com](https://www.issuewire.com)) - Neovyn Pte Ltd and Find Inc. today officially announced a strategic cross-border partnership alongside the commercial deployment of Findmymarket in South Asia. The next-generation, AI-driven B2B SaaS platform is engineered to transform target customer persona creation from a weeks-long manual research project into a precise, one-minute digital

workflow.

The partnership combines Neovyn's deep operational footprint in Asian enterprise tech ecosystems with Find Inc.'s Texas-bred data architecture. The joint deployment focuses heavily on empowering rapidly scaling enterprises across South Asia to eliminate the friction of slow, static, and outdated market research. By utilizing predictive AI models to ingest localized market parameters, specific industries, and raw website URLs, Findmymarket instantly generates complete, actionable ideal customer profiles (ICPs).

"Traditional market research is slow, rigid, and deeply disconnected from the fast-moving commercial realities of the South Asian landscape," said Raghav Singh, CEO of Neovyn Pte Ltd. "With Findmymarket, we are handing regional businesses a living, data-backed engine. This partnership gives us the regional infrastructure to deploy localized AI models that don't just tell you who your buyer is, but empower you to immediately engage them across every marketing and sales touchpoint."

Deep Personalization and Ecosystem Integration

Designed to seamlessly anchor modern commercial tech stacks, Findmymarket goes far beyond basic text summaries by delivering a comprehensive suite of data enrichment and storytelling tools localized for regional business intelligence:

- **Instant Keyword Mapping:** Identifies the precise search intent, high-value keywords, and semantic queries driving the target persona's real-world buying journey.
- **Persona Storytelling Videos (Coming Soon):** Converts raw demographic and firmographic data points into immersive narrative videos, aligning product, sales, and creative teams around a unified buyer identity.
- **Native CRM Integration:** Syncs newly generated buyer personas and target criteria directly into leading CRM platforms to drive automated, highly contextualized email flows and lead scoring rules.
- **In-Depth Qualitative Simulations:** Replicates deep buyer interviews based on real-time web intelligence, highlighting latent pain points and objections before a single sales call is placed.

"Reaching a dynamic audience requires deep localized resonance, not just broad targeting," added Richard Cyrus Jo, CEO of Find Inc. "By combining Neovyn's specialized regional infrastructure with Find Inc.'s strategic data modeling, our South Asia deployment gives growth-focused organizations the agility to build, test, and pivot their persona marketing strategies in real time."

Availability and Regional Rollout

Findmymarket is available starting today for enterprise deployment across South Asia, with dedicated localized language and market parameters optimized for regional commercial hubs. Interested enterprises, growth marketers, and revenue operations teams can request a platform demonstration and generate their first target persona by visiting the official Findmymarket Web Portal.
