

New Release Roundup: Dragon Beast and Portals Bring Myth and Multiverse to Dex System Publishing's Fall Slate

Orion Graves and Chester Craig headline a mid-September spotlight built for readers chasing bigger worlds.

Cleveland, Aberdeen Sep 2, 2026 ([IssueWire.com](https://www.issuewire.com)) - Dex System Publishing's mid-September roundup pairs two titles built around the idea of crossing into somewhere new: *Dragon Beast: Magic of the Machine* by Orion Graves and *Portals* by Chester Craig.

Dragon Beast: Magic of the Machine continues to find an audience among readers who want their fantasy laced with engineering, and their engineering laced with legend. Orion Graves's world-building leans into the friction between old magic and new machinery, a combination that has become one of the more distinctive voices in Dex System Publishing's growing fantasy catalog.

Portals, meanwhile, keeps unfolding its multiverse premise for new readers each month. Dr. Alex Reeves's search for missing sibling Jordan Reeves — alongside physicist Tara Vasquez, and against the schemes of antagonist Eldrin — remains one of the catalog's most requested reads, anchored by the discovery of Site 7-Gamma and its forty-seven connected worlds.

Both titles are available now across ebook, audiobook, and print retailers, with a short-form video preview of *Portals* also available on YouTube for readers who want a first look before diving in.

The pairing also reflects a broader trend in Dex System Publishing's fall catalog: stories that treat crossing a threshold — whether into another dimension or into a world where machinery carries the

weight of legend — as the central act of transformation for their characters. Readers who enjoy one title are frequently pointed toward the other as a natural next read, and September's roundup is designed with exactly that kind of discovery in mind. As always, format availability continues to expand throughout the month, with new retailer listings added as they go live.
