

Omar Ochoa Named to Best Lawyers 2026 for Personal Injury Litigation

McAllen, Texas Sep 17, 2026 ([IssueWire.com](https://www.IssueWire.com)) - Founding attorney Omar Ochoa has earned a place in the 2026 edition of Best Lawyers® in America, one of the legal industry's longest-running and most closely watched peer-review publications. Recognized for his work in Personal Injury Litigation – Plaintiffs, this honor marks a milestone as the first time the Omar Ochoa Law Firm has appeared in the publication.

What makes this recognition meaningful is how it is earned. Best Lawyers relies entirely on a Purely Peer Review® methodology where practicing attorneys evaluate colleagues within their own practice area and region. Only those who consistently earn strong marks from peers make the list. For a plaintiff's litigator, that kind of endorsement carries weight, as it comes directly from lawyers who have opposed, worked alongside, or otherwise observed Ochoa's courtroom conduct firsthand.

[Omar Ochoa](#) founded his firm after building a trial record at Susman Godfrey L.L.P., a firm widely regarded as one of the top litigation shops in the country. Since striking out on his own, he has represented injured Texans and their families in [personal injury](#), property damage, and insurance disputes, while also handling antitrust, class action, and complex commercial matters that have produced hundreds of millions of dollars in recoveries.

A graduate of The University of Texas School of Law, Ochoa served as editor-in-chief of the Texas Law Review and was inducted into the Order of the Coif. This latest honor adds to a growing list of accolades, among them a Super Lawyers Rising Star recognition and a place on the 2025 Super Lawyers list for personal injury.

The Best Lawyers listing further solidifies Omar Ochoa Law Firm's reputation as a trusted advocate for Texans. With offices in McAllen, Edinburg, San Antonio, and Houston, the firm provides accessible legal representation in both English and Spanish across the state.
