

Para Ella Expands Dubai Beauty Choices with Hair, Nails and Skincare

Multi-service ladies salon brings hair transformations, nail care, lash treatments and professional facials together in Azizi Riviera

Dubai, United Arab Emirates Sep 30, 2026 ([Issuewire.com](https://www.issuewire.com)) - Para Ella Hair & Nails Ladies Salon is expanding the range of beauty services available to women in Dubai by combining hair, nail, lash, brow, facial and personal-care treatments at its private Azizi Riviera location.

Clients looking for a [hair salon near me](#) may require anything from a routine cut or blow-dry to a more detailed colour consultation. Para Ella provides hair styling, Wella colour services, balayage, ombre, highlights and ring-technique hair extensions, with recommendations based on the client's hair type and intended result.

Women searching for a [beauty salon near me](#) may also want to coordinate several services without visiting different venues. Alongside its hair menu, Para Ella offers gel and acrylic nails, Russian and French manicures, nail extensions, lash sets, lash lifting, brow lamination, threading, waxing, massage and Guinot Paris facial treatments.

Nail care is another central part of the salon's service offering. Customers comparing a **manicure & pedicure salon near me** can choose from different manicure, pedicure, gel and extension options

after discussing the preferred finish and maintenance requirements with the salon team.

Skincare services use Guinot Paris professional products and include treatments such as Hydradermie Lift, Lift Summum, Hydra Clean and hydrating facial options. Each appointment begins with an assessment of the client's preferences and the selected service rather than applying a single approach to every customer.

The salon operates as a fully private ladies-only space and is open daily until midnight. This combination of service variety, privacy and extended hours is designed to make appointment planning more convenient for women with different schedules.

The expanded menu reflects the way many clients now organise beauty care. Rather than viewing hair, nails, lashes and skincare as unrelated appointments, women may coordinate services around an event, travel plan, work schedule or regular maintenance routine. A multi-service salon can make that planning easier by providing information and appointment options through one team.

Hair colour remains a consultation-led service. The final approach may depend on the client's starting shade, hair condition, previous colour history and intended result. Para Ella lists root colour, full colour, balayage, ombre and full-head highlights among its options. Discussing these details before the appointment helps identify the appropriate service and time requirement.

Hair extensions require similar preparation. Para Ella's ring technique does not use glue or heat bonding, but professional application, maintenance and removal remain important. A consultation allows the stylist to consider the client's natural hair, desired length and volume, colour matching and ongoing care before recommending a plan.

Nail services range from classic maintenance to gel, acrylic, Russian manicure, French, cat-eye and extension options. Clients can select a finish according to personal style and maintenance preference. The salon also provides coordinated hand and foot services for women who want manicure and pedicure care within the same visit.

Lash and brow appointments include classic, Russian, mega-volume and Kim K lash styles, together with lash lifting, brow lamination, tinting, threading and styling. Because the intended look can vary from natural definition to fuller volume, clients are encouraged to share reference preferences and discuss the maintenance involved.

Guinot Paris treatments broaden the salon's skincare offering. Listed facial options include Hydra Clean, Hydradermie Lift, Lift Summum and hydrating services. These treatments form part of a professional beauty-care menu and are not presented as medical procedures. Clients with specific sensitivities or concerns should communicate them before their appointment.

Waxing and massage complete the wider service selection. The salon lists full-body, back and head massage options alongside a comprehensive waxing menu. Availability and suitability can be confirmed directly with Para Ella, particularly when a client wants to schedule several services during one longer visit.

Para Ella's website displays a 4.9 rating from more than 200 Google reviews and links visitors to the original review platform. The salon is also open seven days a week from 10:00 am to midnight. Together, these details allow potential clients to assess location, hours, service range and public feedback before deciding whether to book.

By bringing multiple beauty categories together in a private ladies-only environment, Para Ella offers women more choice without losing a clear identity. The salon's role is to provide professional beauty services, explain available options and help each client plan appointments around her own goals and schedule.

Service variety can also support preparation for significant occasions. A client planning a celebration, professional event or trip may want to coordinate hair, nails, lashes and skincare over one or more appointments. Discussing the schedule early gives the salon an opportunity to recommend a practical sequence and prevents several time-intensive treatments from being compressed into an unsuitable window.

Para Ella's Azizi Riviera address makes the salon part of a developing residential community while its online booking routes extend its reach to surrounding areas. The business combines the accessibility of a neighbourhood salon with a menu that covers several professional beauty categories. This positioning allows women to choose a single service or build a longer-term routine across hair, nail and skincare appointments.
