

Paragon Dentistry Moves to New Location

Paragon Dentistry Relocates to a newly designed office only a few miles away, still in Allen.

Allen, Texas Sep 1, 2026 ([Issuewire.com](https://www.issuewire.com)) - After fifteen years at the previous location, Paragon Dentistry has moved to a new facility. The building is brand new and was specifically designed to better serve patients.

Since the beginning, Paragon has been focused on the Allen and surrounding community. With many long-time patients, the new office had to be fairly close. At the NW corner of Alma Dr. and Exchange Pkwy, it is only a few minutes away from the old office.

The new building is still centrally located, close to 75/Central Expressway and 121. Patients come from Allen, but also from surrounding cities such as Plano, McKinney, and Frisco.

Except for a new facility and new equipment, Paragon has not changed much about the way they treat patients. The staff is the same, as well.

Paragon Dentistry is known for its friendly and welcoming staff, from the front office to the dental

assistants and hygienists, all the way to the dentists. Patients especially appreciate the gentle touch of each caregiver, and also the way even the most anxious patients are made to feel at ease.

Equally important, they value the time of each patient, so they don't overbook. Patients are scheduled at a time, and with each patient having a time slot, they usually don't have to wait to be seen.

Both dentists, Dr. Jason Hui and Dr. Alan McDavid, practice conservative dentistry and take the time to explain treatment options and procedures. Patients are not under pressure to have work done.

Does that make Paragon Dentistry the best dentist in Allen? Dr. Hui doesn't like to brag, but others may think so, as reflected in their many positive reviews on Google and Yelp.

Dr. Hui states, "From the beginning we have worked hard to treat patients with the highest standard of care, and to make them feel at ease and welcome at every step."

Paragon Dentistry is a family and cosmetic dental practice. They treat patients of all ages and conditions.
