

Press Release Title: Green Wise Group Brings Certified Tree Care Expertise to Miami Properties

Green Wise Group is bringing certified tree care services to Miami properties through arborist-guided maintenance, consulting, and landscaping support.

Miami, Florida Sep 25, 2026 ([IssueWire.com](https://www.IssueWire.com)) - Miami's tropical climate, seasonal weather patterns, and diverse tree canopy create ongoing maintenance considerations for residential and commercial property owners. Green Wise Group, a South Florida-based tree service, landscaping service, and consulting company, provides certified tree care in Miami to help address tree health, safety, appearance, and long-term property planning.

The family-owned and locally operated company is led by Founder Gene Sherwood, an ISA Certified Arborist with more than 30 years of experience in tree care and landscaping. Sherwood is also a Consulting Arborist for the University of Miami and serves on the Advisory Board of the Tropical Audubon Society.

Green Wise Group's tree services in Miami include trimming, pruning, tree health assessments, disease diagnosis, pest management, and recommendations for appropriate tree and palm species. The

company also provides landscaping services and tree consulting for property owners seeking to make informed decisions about existing trees, new plantings, and ongoing outdoor maintenance.

Proper pruning and care can be particularly important in South Florida, where trees and palms may be affected by high winds, heavy rainfall, pests, disease, and rapid growth cycles. Arborist-guided tree care can help property owners identify structural concerns, evaluate plant health, and develop maintenance plans suited to individual landscapes.

According to the company, tree decisions can have long-term implications for safety, plant health, and the character of a property. As such, they also cater to providing practical recommendations based on the species, site conditions, and needs of the property.

In addition to routine tree services, Green Wise Group works with homeowners, property managers, and commercial property owners on tree consulting matters. These services may include evaluations of tree condition, guidance on preservation and maintenance, and species-selection recommendations for South Florida landscapes.

The company's approach combines local familiarity with certified arboricultural knowledge. Green Wise Group's work encompasses trees, palms, shrubs, and surrounding landscaping, recognizing that each component can affect the health and function of an outdoor space.

Information about the company's Miami tree care services is available through the [Green Wise Group website](#). Additional [tree consulting details](#) outline the company's work with residential and commercial properties throughout South Florida.

Based in South Florida, Green Wise Group continues to provide tree services, landscaping services, and consulting support for Miami-area properties seeking informed, site-specific outdoor care.
