SmartAlgoTrade Launches Free One-Year Double FX Robot License for New Partner Broker Accounts

Traders opening a qualifying live account with a SmartAlgoTrade partner broker receive twelve months of the MT4 Expert Advisor at no software cost, funded through broker partnerships rather than charged to the trader.

Limassol, Cyprus Sep 15, 2026 ([Issuewire.com](https://www.issuewire.com)) - SmartAlgoTrade, which builds automated trading systems for the retail currency market, has opened a promotional window in which new brokerage clients can obtain a twelve-month license to its flagship Double FX Robot without paying a software fee.

The Double FX Robot is an Expert Advisor (EA) written for the MetaTrader 4 platform. It works on major currency pairs such as EUR/USD and GBP/USD, and once it has been installed and switched on inside a trader's MT4 terminal, it follows its programmed strategy continuously through trading hours. No chart-watching and no manual order entry are required on the trader's side.

Eligibility works as follows: a trader opens a new live account with one of SmartAlgoTrade's partner brokers and funds it with the qualifying minimum deposit. The one-year license, which normally carries an annual fee, is then issued at no extra charge. SmartAlgoTrade covers the cost through its broker partnership agreements, so nothing beyond the trading deposit is billed to the client.

According to the company, the offer is aimed at newcomers and experienced traders alike who are curious about rules-based automation instead of discretionary trading. Because execution is handled by the software, the same strategy is applied in the same way regardless of the trader's schedule, time zone, or state of mind during volatile sessions.

"Our mission is to make algorithmic trading accessible to everyone, not just institutional investors," the company said, adding that its robots are built to take emotional decision-making out of a trading plan. Tools of this kind were long associated mainly with hedge funds and professional desks; partnerships with regulated brokers are what bring them within reach of individual retail traders.

SmartAlgoTrade reports that most clients renew once the free year is over, having had the chance to judge the robot's behaviour on their own account first. The usual caveats apply: past performance is not a guarantee of future results, and forex trading carries a risk of loss that can extend to part or all of an initial deposit.

The full terms of the promotion, including which partner brokers take part and what the minimum deposit is, are set out at https://www.smartalgotrade.com/free-fx-robot/
