

Smile Muse Spa Brings Spa-Inspired Model to Dental Care in Fort Worth

Fort Worth, Texas Sep 10, 2026 ([Issuewire.com](https://www.issuewire.com)) - Smile Muse Spa brings comfort and individualized care to dental treatment in Fort Worth, Texas. The practice combines general, cosmetic, emergency, and sedation dentistry within a spa-like setting designed around each patient's ease and well-being.

Led by Dr. Carmen Blunt Davis, the practice takes time to understand every patient's needs, concerns, and goals, shaping care around them. The result is a treatment experience that prioritizes comfort, oral health, and the patient as a whole, not just the procedure.

A More Comfortable Dental Visit

At [Smile Muse Spa](#), the team believes the dental experience should address more than the clinical aspect of treatment. The practice brings together dental care and a calming environment to help patients feel more relaxed during their visits.

The practice's patient-centered approach includes:

- Personalized treatment planning based on individual needs and goals
- Multiple sedation dentistry options
- General, cosmetic, and emergency dental services
- Gentle and minimally invasive treatment approaches

- A focus on long-term oral health and wellness

This approach reflects a commitment to innovation, compassion, and excellence, with attention to each patient's individual needs and treatment experience.

General, Cosmetic, and Emergency Dental Services Under One Roof

The clinic's general dentistry services include dental cleanings and exams, fillings and restorations, crowns and bridges, root canal therapy, and tooth extractions. Through these services, the practice focuses on providing high-quality, customized dental treatments based on each patient's dental needs.

For patients interested in improving their smiles, the practice's cosmetic dentistry services include professional teeth whitening, porcelain veneers, clear aligners, smile makeovers, resin infiltration, and Botox therapy. Their team focuses on treatments that support each patient's individual smile goals while maintaining its emphasis on comfort and personalized care.

They also provide emergency dental care for patients experiencing urgent concerns, including severe toothaches, chipped or broken teeth, swelling, and urgent extraction needs.

By offering these services within one practice, Smile Muse Spa provides patients with access to different areas of dental care based on their individual needs.

Sedation Options Focused on Patient Comfort

Sedation is one part of the clinic's approach to providing precise, effective, and comfort-focused treatments. The team offers several sedation options for patients who experience dental anxiety or require additional support during treatment.

Available options include:

- Nitrous oxide, also known as laughing gas
- Oral sedation
- IV sedation
- General anesthesia

The appropriate sedation option depends on the patient's treatment and individual circumstances. The goal is to help patients understand their available options and receive care in a setting designed with comfort in mind.

Led by Dr. Carmen Blunt Davis

Dr. Carmen Blunt Davis leads the practice with a focus on general dentistry and aesthetic smile transformations. She earned a Biology degree from Hampton University in Virginia before completing her Doctorate in Dentistry at Meharry Medical College in Tennessee.

At the clinic, the team emphasizes patient comfort, personalized treatment, and continued learning in general and cosmetic dentistry. These principles guide how the practice approaches each patient's dental care and treatment experience.
