

Texas Sleep & TMJ Solutions Moves to New Location

Texas Sleep & TMJ Solutions has relocated to a new office in nearby Allen.

Allen, Texas Sep 2, 2026 (Issuewire.com) - After ten years at the previous location, Texas Sleep & TMJ Solutions has moved to a new facility. The building is brand new and was specifically designed to better serve patients.

Although the move is from McKinney to Allen, it is less than ten miles away. They will be centrally located in Allen. The new office is close to 75/Central Expwy and Highway 121, as well as being accessible from Plano, McKinney and Allen.

The entire staff remains intact at the new space, and will continue treating patients with the highest level of care.

The new office will be shared with Paragon Dentistry, which is a general dentistry practice. Both dentists

at Texas Sleep & TMJ Solutions also work at Paragon, so it was a natural move to consolidate space.

Texas Sleep & TMJ Solutions specializes in treating sleep apnea and also TMJ disorder. These two issues are sometimes related, but also can be distinct. Snoring is a symptom often related to sleep apnea, and it can also be treated in a similar way, even if the snorer does not have sleep apnea

Sleep apnea and TMJ disorder are common problems in both men and women, as well as for all ages. Many people remain undiagnosed for years, suffering in silence without awareness that help is available.

Dr. Jason Hui and Dr. Alan McDavid both have special training in sleep disorders and TMJ issues. While most dentists have standard training and exposure to these problems, Drs. Hui and McDavid have extensive training and experience in dealing with them.

Numerous patients over the years have found help and pain relief through the treatment they received at Texas Sleep & TMJ Solutions.

The many positive reviews they have received online reflects the great care their patients have felt.

Dr. McDavid says that he looks forward to continue providing help for those suffering symptoms of these common problems.
