

Urban Alcove Launches Free AI Home Decor Prompt Builder to Help Shoppers Ask Better Questions

New tool turns decorating goals, room details and shopping constraints into editable prompts for ChatGPT, Gemini and other AI assistants.

URBAN
ALCOVE

Austin, Texas Sep 29, 2026 ([Issuewire.com](https://www.issuewire.com)) - Urban Alcove has launched a free [AI Home Decor Prompt Builder](#) designed to help people describe their decorating goals clearly before turning to an AI assistant. The interactive tool takes a visitor's choices and creates an editable prompt for planning a room, exploring a style, finding products, or comparing options.

A person may know that a room feels unfinished, but not know how to ask AI for a useful plan. A broad request such as “help me decorate my room” leaves out details that change the answer: what the person already owns, what they hope to buy, the size of the space, their style preferences, and their budget. Urban Alcove built the tool to help visitors put those details into words.

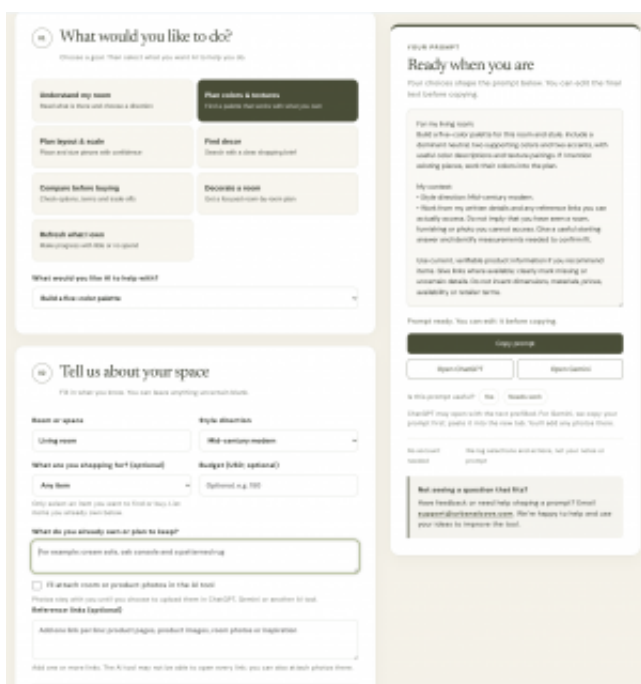

Visitors begin by choosing what they want to accomplish, from understanding a room and planning colors to checking scale, searching for decor, and comparing products. They can choose a guided task or describe their own. The builder then incorporates the room, preferred style, shopping target, budget, and any measurements, priorities, or reference links the visitor provides. The resulting prompt can be edited and copied for use in an AI assistant. Visitors who want to discuss room or product photos add them in the AI tool rather than uploading them to the builder.

“People often have a clear feeling about what they want from a space, even when they cannot name the style or write a detailed prompt,” said Andrew T. Lyons, owner and operator of Urban Alcove. “We wanted to make that first step easier, so a question about a room becomes specific enough to explore useful ideas and make more informed choices.”

The tool includes 79 streamlined guided tasks organized around seven decorating goals. It is free to use at <https://urbanalcove.com/pages/ai-home-decor-prompt-builder>. Urban Alcove has also published a companion article on how to use AI for home decor shopping at <https://urbanalcove.com/blogs/alcove-living/how-to-use-ai-for-home-decor-shopping>, along with a free, copyable 100-prompt PDF linked from both pages.

About Urban Alcove

Urban Alcove is an independently operated online home decor store based in Austin, Texas. It offers decorative accents, lighting, soft furnishings, wall decor, and storage pieces, alongside articles and buying guides intended to help people make practical, personal decorating decisions.

The screenshot displays the 'What would you like to do?' section of the Urban Alcove AI Home Decor Prompt Builder. It features a grid of six task cards: 'Understand my room', 'Plan layout & scale', 'Compare before buying', 'Multitask other rooms', 'Find colors & textures', 'Find decor', 'Decorate a room', and 'Build a five-color palette'. Below these is a text input field for a specific request. The right sidebar, titled 'YOUR PROMPT', shows a 'Ready when you are' section with instructions on how to build a prompt, a 'Copy prompt' button, and a 'Paste prompt' button. It also includes a 'Not seeing a question that fits?' section with a link to a FAQ page.

YOUR PROMPT

Ready when you are

Your choices shape the prompt below. You can edit the final text before copying.

For my living room:

Build a five-color palette for this room and style. Include a dominant neutral, two supporting colors and two accents, with useful color descriptions and texture pairings. If I mention existing pieces, work their colors into the plan.

My context:

- Style direction: Mid-century modern.
- Work from my written details and any reference links you can actually access. Do not imply that you have seen a room, furnishing or photo you cannot access. Give a useful starting answer and identify measurements needed to confirm fit.

Use current, verifiable product information if you recommend items. Give links where available; clearly mark missing or uncertain details. Do not invent dimensions, materials, prices, availability or retailer terms.

Prompt ready. You can edit it before copying.

Copy prompt

Open ChatGPT

Open Gemini

Is this prompt useful? ☐ Yes ☐ Needs work

ChatGPT may open with the text prefilled. For Gemini, we copy your prompt first; paste it into the new tab. You'll add any photos there.

No account needed

We log selections and actions, not your notes or prompt

Not seeing a question that fits?

Have feedback or need help shaping a prompt? Email support@urbanalcove.com. We're happy to help and use your ideas to improve the tool.
