- Angiogram
- 2D Scan
- MRI
- Thyroid Panels
- Diabetes Markers
- Lipid Profile
- Vitamins & Other Tests

Alcounsyl provides informational support, not a diagnosis or a substitute for your doctor.

Pune, Maharashtra Oct 25, 2026 ([Issuewire.com](https://www.issuewire.com)) - Alcounsyl Health Report Guide, the AI-powered health platform from OptraHEALTH, has surpassed 50,000 downloads across iOS and Android, driven largely by organic, patient-led adoption and growing engagement with hospitals and specialty clinics across India.

Designed to support multiple medical specialties, Alcounsyl helps users understand cardiac and laboratory reports covering cardiology, diabetes, thyroid, radiology, and general pathology. Users can upload reports to receive personalized explanations, understand test values in context, ask follow-up questions, and connect with medical experts through ExpertConnect. Its standalone Heart Health Check also helps users explore cardiovascular risk without uploading a report.

“Crossing 50,000 downloads is an encouraging milestone in our mission to make healthcare information more accessible and understandable. We built Alcounsyl to help people make sense of their health reports across multiple medical specialties, empowering them to ask better questions and participate more confidently in their healthcare decisions. The growing adoption by individuals and healthcare institutions reinforces our belief that AI can bridge the gap between diagnostic information and patient understanding—while keeping clinicians at the center of care. This is just the beginning of our journey to make informed healthcare accessible to everyone,” said Dr. Gauri Naik, Founder & CEO of OptraHEALTH.

Growing Adoption Across Healthcare

Beyond individual adoption, Alcounsyl is gaining traction among healthcare institutions. Hospitals and specialty clinics across India are using the platform to help patients better understand their reports, support follow-up between visits, and make consultations more productive. Its presentation at the Cardiological Society of India also generated encouraging interest among practicing cardiologists.

In India, where diagnostic testing is increasingly accessible, understanding test results remains a significant challenge. Alcounsyl addresses this gap by translating complex health information into clear, personalized explanations, helping patients prepare for more informed conversations with their healthcare providers.

Empowering Patients, Supporting Clinicians

Alcounsyl is designed to complement—not replace—clinical care. It helps patients understand their reports and prepare questions, while diagnosis and treatment decisions remain with qualified healthcare professionals. By enabling patients to arrive better informed, the platform aims to strengthen patient engagement and support more meaningful clinical conversations.

About Alcounsyl

Alcounsyl Health Report Guide, developed by OptraHEALTH, is a free AI-powered app available on iOS and Android. It helps users understand cardiac and laboratory reports through personalized explanations and provides access to medical experts through ExpertConnect. Its Heart Health Check offers an educational assessment of cardiovascular risk. Alcounsyl is an healthcare platform and does not provide medical advice, diagnosis, or treatment, nor does it replace consultation with a qualified healthcare professional.
