

CarChalak Expands Driver Booking Services to Chandigarh for Local and Outstation Travel

Professional driver booking platform brings flexible on-call, hourly and outstation driver services to car owners in Chandigarh.

Chandigarh, India Oct 15, 2026 ([Issuewire.com](https://www.issuewire.com)) - CarChalak, a driver-booking platform operated by CarChalak - Kevalin Sarthi Services LLP, has expanded its driver services to Chandigarh, giving residents and visitors another option for arranging professional drivers for their own vehicles. The service is designed to support everyday travel, business appointments, family outings, airport journeys, and trips to destinations outside the city.

With this expansion, CarChalak aims to make driver booking more accessible for people who prefer travelling in their own cars but do not always want to drive themselves. Customers can explore available services and submit their journey requirements through the company's website and mobile application.

Driver Booking for Everyday Travel in Chandigarh

Chandigarh's planned sectors, residential neighbourhoods, commercial areas and business districts create a variety of local travel needs. Residents may need driving assistance for office commutes, shopping, family visits, appointments and social events. Visitors may also require a driver when travelling between hotels, business locations, tourist attractions and nearby destinations.

CarChalak provides a platform through which customers can explore driver-booking options according to their travel requirements. Instead of arranging a driver independently, customers can enter their journey details and review the available booking options.

The service is intended for people who want to use their own vehicles while having a professional driver handle the driving.

Driver Services Available in Chandigarh

CarChalak offers several driver-service options to accommodate different travel requirements, subject to availability.

Driver on Call: Customers can explore on-call driver bookings for individual journeys, appointments, personal errands, and other occasions when they need temporary driving assistance.

Hourly Driver Service: This option can suit customers who have several stops planned within a few hours, such as shopping trips, business meetings, or family visits.

Personal and Permanent Driver Services: Customers with recurring driving requirements can explore arrangements for regular personal or business travel.

Airport Transfers: Drivers can be booked for airport-related journeys, allowing customers to travel in their own vehicles rather than drive themselves.

Outstation Driver Service: For journeys beyond Chandigarh, customers can explore driver options for longer road trips, family visits, and other intercity travel requirements.

Customers can review the relevant service details, estimated fare, and booking conditions before confirming a journey.

Supporting Travel Across Chandigarh and Nearby Destinations

Chandigarh serves as an important residential, commercial and administrative centre in North India. Its connections with neighbouring areas, including Mohali and Panchkula, create travel requirements that extend beyond individual sectors.

CarChalak's Chandigarh service page highlights locations and travel needs across the city, including Sector 17, Sector 35 and IT Park, as well as nearby destinations in the tri-city region. Customers should enter their precise pickup and destination details to check service coverage and driver availability for their particular journey.

Whether travelling for work, attending a family event or planning a road trip, customers can explore suitable driver-booking options based on their schedules and destinations.

Booking Through the CarChalak Platform

CarChalak provides an online platform and mobile applications through which customers can explore driver services and submit booking details.

The booking process involves selecting the required service, entering the pickup location and destination, providing relevant journey information, and reviewing the available booking details. Driver assignment depends on the requested location, time, and service availability.

The platform also highlights features such as driver verification, professional training, and estimated

fare information. These features are intended to help customers make informed decisions when arranging driving assistance.

Customers can learn more about the service through the [CarChalak driver service](#) page for Chandigarh.

A Wider Service Network

CarChalak was established in April 2017 and operates under Kevalin Sarthi Services LLP. The company provides driver-booking services for customers who want professional driving assistance for local and outstation journeys in their own vehicles.

According to the company's official About Us page, CarChalak's platform lists more than 4,800 drivers and over 1.9 million driving hours. These figures reflect the company's published platform statistics and should be checked against the latest company data before republication.

The expansion to Chandigarh represents a further step in making its driver-booking options available to customers in additional locations. Its service model focuses on connecting customers with drivers for different journey types through a digital booking process.

Booking a Driver in Chandigarh

Residents and visitors looking for a driver in Chandigarh can explore the available services and submit their travel requirements through CarChalak's website or mobile application.

From local journeys and hourly bookings to airport travel and outstation trips, the platform offers options for customers who prefer to travel in their own vehicles with a driver.
