

Casence Luxe: Built to Fix What Existing Anti-Yellow Cases Get Wrong

From staying clear to actually protecting your flagship — Casence Luxe brings 10.8 Ft drop protection, Camera Control, strong N52 magnets and a Lifetime Warranty to iPhone & Samsung.

New Delhi, Delhi Oct 26, 2026 ([Issuewire.com](https://www.issuewire.com)) - While developing [Casence Luxe](#), the Casence team identified a clear gap in the existing anti-yellow case market.

As a founder, we saw that most [anti-yellow cases](#) focused only on preventing yellowing, but didn't offer the level of protection and functionality flagship users expect. Many cases get scratched within weeks, don't offer a smooth Camera Control experience on iPhone, and use metal rings instead of actual magnets for wireless charging.

That insight led to the creation of [Casence Luxe](#) — a premium case designed to combine clarity, protection and functionality in one product.

Luxe features **Airbag Cushioning with up to 10.8 Ft Drop Protection, 1.8mm raised camera and screen bezels**, and an **Anti-Scratch Coating** for everyday durability.

For compatible iPhones, the **AI Button for Camera Control** is designed to provide a smooth and responsive experience. The case also features **strong N52 magnets** for a secure magnetic connection, rather than relying on a simple metal ring.

Adding to the premium experience are **tactile buttons** and a **Lifetime Warranty**, giving users confidence beyond the first purchase.

Designed for **flagship iPhone and Samsung smartphones**, Casence Luxe is built around one simple idea:

Your flagship deserves more than an anti-yellow case. It deserves Luxe.
