

Ditya Group Commits US\$5 Million Investment to Lithosphere Ahead of LITHO TGE

The strategic commitment supports Lithosphere's AI-native Web3 infrastructure as the ecosystem enters its next phase of growth ahead of the October 15 Token Generation Event.

Singapore, Singapore Oct 6, 2026 ([Issuewire.com](https://www.issuewire.com)) - [Lithosphere](#), the AI-native Layer 1 blockchain ecosystem developed for autonomous systems, intelligent applications, and decentralized infrastructure, today announced a US\$5 million investment commitment from Ditya Group as the network moves into its next phase of development and ecosystem expansion.

Ditya Group announced the commitment as a strategic investment in Lithosphere, citing its belief in the convergence of artificial intelligence, blockchain, Web3, and intelligent digital infrastructure. The investment comes as Lithosphere prepares for the LITHO Token Generation Event on October 15, 2026, a milestone expected to expand participation across the network and its growing ecosystem.

The commitment provides additional strategic support for Lithosphere as it continues developing infrastructure around AI-native execution, autonomous systems, blockchain interoperability, developer tooling, and decentralized applications. The network is building an ecosystem designed to connect intelligent applications with the infrastructure required for execution, coordination, identity, and broader onchain activity.

"This investment reflects growing strategic interest in the infrastructure being built around Lithosphere," said [J. King Kasr](#), Chief Scientist at KaJ Labs. "As we move toward the next stage of the network, our focus remains on building the technology, products, and ecosystem needed to support

autonomous systems and intelligent digital economies at scale.”

Lithosphere’s ecosystem has expanded across infrastructure and user-facing products, including Thanos Wallet, Ignite DEX, Quantts AI, developer tooling, and network technologies designed to support the broader LITHO ecosystem. The additional investment commitment strengthens the resources available to support continued development, ecosystem participation, integrations, and global expansion.

Ditya Group stated that its investment reflects its confidence in Lithosphere’s continued development and its longer-term vision around AI-native infrastructure, autonomous systems, blockchain technology, and next-generation digital ecosystems. The group also indicated that it intends to support Lithosphere as the ecosystem progresses into its next stage of growth.

With the LITHO TGE approaching on October 15, the US\$5 million commitment adds another strategic capital milestone as Lithosphere advances toward broader network participation and expands the infrastructure supporting its AI-native ecosystem.

About Lithosphere

Lithosphere is an AI-native Layer 1 blockchain ecosystem developed by KaJ Labs for autonomous agents, intelligent applications, Web4 infrastructure, and cross-chain digital systems. Its technology stack is designed to support execution, identity, coordination, verification, wallet access, interoperability, and developer activity across connected decentralized environments.
