Fairfax, Virginia Oct 15, 2026 ([IssueWire.com](https://www.issuewire.com)) - Excise720 announced the launch of its flat-rate federal excise tax filing service, offering eligible [Form 720 e-filing for \\$9.95 per return](#).

The company says the pricing is designed to provide businesses and tax professionals with a straightforward filing cost without separate charges based on the number of supported tax categories included in an eligible return.

The service is designed for **CPAs, tax preparers, bookkeepers, accounting firms and businesses** that manage federal excise tax filing obligations throughout the year.

A Simpler Approach to Excise Tax Filing

Federal excise tax filing can involve multiple tax categories, recurring filing periods and quarterly

deadlines. Professionals managing filings for multiple businesses may also need to maintain filing records and monitor submission activity across clients.

Excise720 brings preparation, electronic submission and filing records together through an online platform, giving users a central place to manage eligible excise tax returns.

The flat-rate approach is designed to provide a predictable filing cost for businesses and professionals who may handle recurring returns or multiple client filings.

Security and Infrastructure

Tax filings contain sensitive financial and business information, making security an important consideration for online filing services.

Excise720 uses **AWS-based infrastructure** and has undergone **Vulnerability Assessment and Penetration Testing (VAPT)** to help identify potential security weaknesses in its systems and applications.

The security approach is intended to provide an additional layer of assessment for a platform that handles tax and business information electronically.

Excise720 is an [IRS-authorized e-file provider](#) and electronically transmits eligible returns through the IRS **Modernized e-File (MeF)** system.

Electronic submission allows eligible returns to be filed online rather than relying solely on paper-based filing.

For tax professionals and businesses handling recurring quarterly obligations, the platform provides a centralized way to prepare returns, submit filings and review filing activity.

Managing Filing Activity

Beyond electronic submission, Excise720 provides features designed to help users manage their filing activity throughout the year.

The platform provides:

- A user-friendly filing dashboard
- Access to previous filing records
- Secure document storage and retrieval
