

Grand Mirrors Achieves UL Recognition, Reinforcing Its Commitment to Safety, Quality, and Custom Mirror Innovation

Newport Beach, California Oct 28, 2026 ([Issuewire.com](https://www.issuewire.com)) - Grand Mirrors, the premium illuminated mirror brand of [Evervue](#), announces its achievement of UL Recognition (RU) under File Number E552871, marking a significant milestone in its commitment to product safety, manufacturing quality, and innovative mirror solutions.

The recognition covers applicable components under the category “Furnishings, Household and Commercial – Component,” reflecting an independent evaluation against relevant safety requirements by UL Solutions. This milestone further strengthens Grand Mirrors’ commitment to developing customizable illuminated mirrors for residential, hospitality, commercial, and architectural projects worldwide, where aesthetic excellence and technical considerations are equally important.

Strengthening Confidence Through Independent Safety Evaluation

UL Recognition is an established component certification program administered by UL Solutions, a globally recognized organization specializing in safety science, testing, and certification. The UL Recognized Component Mark indicates that applicable components or subassemblies have been evaluated against relevant safety requirements for use within larger systems or finished products, subject to specified conditions of acceptability.

Unlike UL Listing, which evaluates complete products, UL Recognition applies specifically to components intended for incorporation into end products.

For Grand Mirrors, Recognition under File Number E552871 provides architects, designers, contractors, and project stakeholders with an additional reference when reviewing applicable component specifications and safety-related requirements. The achievement underscores the brand’s commitment to integrating thoughtful engineering and recognized safety considerations into its manufacturing approach.

Combining Design Flexibility With Technical Excellence

Grand Mirrors specializes in custom-made illuminated mirrors that combine modern design, advanced LED lighting, and precision manufacturing.

Recognizing that every interior project presents distinct aesthetic and functional requirements, the company offers extensive customization capabilities, including:

- Custom mirror dimensions and shapes
- Adjustable LED lighting configurations and design options
- Decorative frame styles and finishes
- Flexible mounting and installation solutions
- Project-specific configurations and functional features

These capabilities allow Grand Mirrors to support diverse environments, including luxury residences, hotels, wellness facilities, salons, restaurants, and commercial developments. For design professionals, the ability to customize mirrors according to spatial requirements, lighting preferences, and architectural

concepts enables greater flexibility without compromising the intended visual character of a space.

The UL Recognition milestone complements this design-focused approach by reinforcing the importance of technical evaluation alongside customization and manufacturing expertise.

Advancing Innovation in Architectural Mirror Solutions

As illuminated mirrors increasingly serve as integrated architectural elements rather than standalone accessories, the demand for solutions that balance functionality, visual sophistication, and technical requirements continues to influence modern interior design.

Grand Mirrors addresses these considerations through a manufacturing approach centered on customization, material selection, LED lighting integration, and attention to product development. Its mirror solutions are designed to complement contemporary bathrooms, dressing rooms, hospitality interiors, and specialized commercial environments while accommodating individual project specifications.

By incorporating independently evaluated components within the applicable recognition scope, Grand Mirrors continues strengthening its approach to product development and technical accountability.

Supporting Long-Term Growth and Industry Confidence

Achieving UL Recognition represents another important step in Grand Mirrors' continued growth and commitment to serving an international customer base. As the brand expands its offerings and supports increasingly diverse projects, it remains focused on delivering illuminated mirror solutions that unite design innovation, manufacturing precision, and responsible product development.

The milestone reinforces Grand Mirrors' broader vision of providing customizable mirror solutions that respond to evolving architectural expectations while maintaining a strong focus on quality and applicable safety considerations.

About Grand Mirrors

Grand Mirrors is Evervue's premium brand specializing in custom-made illuminated mirrors for residential, hospitality, commercial, and architectural applications. Combining advanced LED technology, precision manufacturing, and extensive customization capabilities, Grand Mirrors works with homeowners, architects, interior designers, builders, and hospitality professionals to create mirror solutions tailored to individual project requirements.
