

KangYu Opens Expanded Research and Development Center in Yancheng

Yancheng, Jiangsu Oct 23, 2026 ([Issuewire.com](https://www.issuewire.com)) - [KangYu EnTech](#) officially opened its relocated research and development center in Yancheng, Jiangsu, on June 14, 2026. The new premises provide nearly 500 square meters of space for technical development, project coordination and customer support.

The center brings engineering, domestic sales and international sales teams together with management and support functions. Its opening gives these teams an expanded base for developing industrial exhaust treatment projects and coordinating their delivery.

Reception area at KangYu's new research and development center in Yancheng.

Space for technical work and project reviews

The premises include office areas, research and development space, and meeting facilities. The technical team works on exhaust treatment process development and equipment improvements, while the meeting space supports design reviews, project discussions and customer proposals.

Connecting engineering with customer requirements

Domestic and international sales teams work alongside the technical department to communicate customer requirements and coordinate proposals. The center also accommodates administrative and

finance functions that support day-to-day project work.

The expanded premises bring these activities into a shared working environment. For customers, the relevant focus remains the practical work carried out there: assessing production conditions, developing treatment proposals and coordinating with manufacturing and site teams.

A focus on industrial exhaust treatment

KangYu develops and supplies industrial exhaust treatment equipment, including regenerative thermal oxidizers, catalytic oxidation systems, adsorption and concentration systems, electrostatic collectors and wet scrubbers. Its applications include coating, plastics processing, rubber, printing and chemical production.

The company's service scope covers process design, equipment manufacture, installation, commissioning and after-sales support. The Yancheng center supports the engineering and coordination work behind these services.

New center address

Rooms 2001 and 2002, Building 10, Financial City, Kaifang Avenue, Yancheng, Jiangsu, China.
