SERVING
MONTGOMERY, TX
& GREATER HOUSTON
AREA

Montgomery, Texas Oct 14, 2026 ([IssueWire.com](https://www.issuewire.com)) - Avenity Business Solutions strengthens its focus on AI search visibility, SEO, and foundational digital marketing for professional service providers throughout Montgomery and Greater Houston.

Avenity Business Solutions, a digital marketing agency based in Montgomery, Texas, is expanding its AI search visibility and search engine optimization (SEO) services to help professional service providers strengthen their online presence as artificial intelligence changes how potential customers discover and evaluate businesses.

Serving Montgomery and the Greater Houston area, the agency offers AI visibility services, Google Business Profile optimization, SEO, Google Ads, and Meta advertising. Its approach emphasizes

building a consistent digital foundation that supports businesses' broader marketing efforts.

Helping Professional Service Providers Adapt to AI-Powered Search

As AI-powered search tools become another way consumers research businesses and services, professional service providers face new considerations in maintaining their online visibility.

While traditional search engines and business listings remain important, AI-generated search responses introduce additional ways potential customers may encounter information about service providers.

For professional service businesses that depend on building trust and attracting qualified inquiries, maintaining accurate, consistent, and accessible information across their digital presence is an important part of helping prospective clients find and evaluate their services.

Avenity Business Solutions recognizes that a common challenge for professional service businesses is maintaining a consistent presence across multiple digital channels while keeping up with changes in search technology.

A Foundation-First Approach to Digital Marketing

Avenity Business Solutions focuses on helping businesses establish foundational marketing elements before investing additional resources in advertising and content creation.

Its services include AI visibility, Google Business Profile optimization, SEO, Google Ads, and Meta advertising. These offerings support businesses seeking to improve their digital presence while maintaining a more coordinated marketing approach.

The agency was founded by Andrea Katen, who brings 15 years of marketing experience across corporate environments and boutique agency work. Katen also holds an MBA and has an educational background in marketing administration.

Founder Quote — Pending Review and Approval

"We started Avenity Business Solutions because we wanted business owners to have another option beyond constantly creating social media videos or spending heavily on advertising that doesn't always generate qualified leads," said Katen. "We believe businesses should start with strong marketing foundations so the time and money they invest in marketing have a better opportunity to work together."

Through its expanded focus on AI search visibility and SEO, Avenity Business Solutions aims to help professional service providers throughout Montgomery and Greater Houston navigate evolving digital search behavior without relying exclusively on paid advertising or social media content.
