

Neuriti'i Inc. Signs GMP Manufacturing Agreement with Vantage Nutrition for Proprietary Cognitive Support Supplements

Partnership brings together Neuriti'i's neurologist-formulated, science-informed approach to comprehensive cognitive support with Vantage Nutrition's advanced nutraceutical manufacturing capabilities and internationally recognized quality systems.

Dover, Delaware Oct 26, 2026 ([Issuewire.com](https://www.issuewire.com)) - Neuriti'i Inc., a Delaware-based company developing neurologist-formulated dietary supplements for brain health and cognitive support, today announced the signing of a GMP Manufacturing and Supply Agreement with Vantage Nutrition, a global specialist CDMO for advanced supplement formats and delivery technologies.

The agreement establishes a strategic manufacturing relationship supporting the production and commercialization of Neuriti'i's proprietary line of dietary supplements. Formulated by a neurologist and informed by published scientific research, the Neuriti'i system was developed to provide comprehensive nutritional support across multiple interconnected areas of brain physiology rather than focusing on a single ingredient or mechanism.

The partnership brings together Neuriti'i's proprietary, science-informed formulations with Vantage Nutrition's expertise in custom formulation development, advanced delivery technologies and high-

precision supplement manufacturing.

Advanced Manufacturing and International Quality Standards

Vantage Nutrition has state-of-the-art manufacturing facilities in the US and India giving nutraceutical brands scale and supply security.

Vantage Nutrition's manufacturing facility in India has been assessed by Intertek Certification Limited and certified to FSSC 22000 Version 6 for Food Manufacturing. The certification incorporates ISO 22000:2018, ISO/TS 22002-1:2009, and additional FSSC 22000 requirements.

The Intertek certificate, specifically covers manufacturing of nutraceutical food and dietary supplements involving combinations of vitamins, minerals, botanicals, and herbs in liquid-filled and powder/granule-filled capsules.

Together with Vantage Nutrition's GMP and HACCP-based manufacturing and quality systems, these capabilities provide the infrastructure necessary for the manufacture of sophisticated multi-ingredient nutraceutical formulations intended for international markets.

Abhishek Jain, Business Head of Vantage Nutrition LLP, commented:

"We are delighted to partner with Neuriti'i Inc. in bringing its innovative brain health formulations to market. Cognitive wellness represents an increasingly important area of health and nutrition, and we believe that sophisticated formulations deserve equally sophisticated manufacturing capabilities. Our commitment to GMP standards, internationally recognized quality systems, and advanced nutraceutical technologies makes this partnership a natural fit. We look forward to supporting Neuriti'i as it establishes a distinctive presence in the global cognitive wellness market."

A Proprietary Approach to Comprehensive Brain Health

Neuriti'i has developed a proprietary, multi-product nutritional system designed around the understanding that cognitive health depends upon multiple interconnected aspects of brain physiology.

Rather than relying on a single ingredient or biological mechanism, the Neuriti'i system brings together carefully selected nutritional ingredients intended to provide complementary support across multiple areas of cognitive and neurological function.

Neuriti'i Blue™ is formulated to support neuronal membrane health, cellular energy and mitochondrial function, and antioxidant protection through a combination of selected nutrients and bioactive compounds.

Neuriti'i Gold™ is designed to support neuronal signaling, cognitive function, and normal neurological processes through a carefully selected combination of magnesium and complementary cognitive-support ingredients.

Neuriti'i Copper™ is developed to support cholinergic function, neuronal communication, and neuroplasticity-related physiology through a complementary combination of nutritional ingredients and botanical compounds.

Together, the three proprietary formulations incorporate 16 distinct ingredients across six

complementary areas of cognitive support:

- Neuronal membrane health
- Cellular energy and mitochondrial function
- Antioxidant protection
- Neuronal signaling and communication
- Cholinergic function
- Neuroplasticity

Ingredient selection and daily amounts have been informed by published scientific research, with the objective of creating a comprehensive nutritional system for supporting cognitive wellness.

Manufacturing Excellence Meets Scientific Innovation

Under the Manufacturing and Supply Agreement, Vantage Nutrition will provide manufacturing services supporting the production of Neuriti'i's proprietary formulations, including ingredient handling, manufacturing process controls, quality assurance, and finished-product production.

The collaboration is intended to provide the manufacturing quality, consistency, product integrity, and scalability necessary to support Neuriti'i's planned commercialization in the United States and other markets.

Gauri Sawant, Sales and Business Development Manager at Vantage Nutrition LLP, stated:

"Neuriti'i represents the type of innovative, science-driven nutraceutical brand that we are particularly excited to support. Its three-formula approach to cognitive wellness presents interesting formulation and manufacturing requirements, particularly given the diversity of ingredients and the importance of maintaining consistent quality. Our technical and commercial teams will work closely with Neuriti'i to translate these proprietary formulations into high-quality finished products suitable for the demanding U.S. dietary supplement market."

Building a New Standard in Cognitive Wellness

Neuriti'i is developing its supplement portfolio for adults seeking comprehensive nutritional support for memory, attention, mental clarity, cognitive performance, and long-term brain health.

The company emphasizes scientific ingredient selection, meaningful ingredient quantities, formulation transparency, manufacturing quality, and a multi-pathway approach to brain health as central elements of its product-development philosophy.

Vidula Patwardhan, Vice President of Business Operations at Neuriti'i Inc., commented:

"Selecting the right manufacturing partner is one of the most important decisions in bringing a sophisticated nutritional formulation to market. Vantage Nutrition offers the technical capabilities, manufacturing infrastructure, and commitment to quality that we believe are essential for Neuriti'i. Our proprietary formulations were developed around the understanding that cognitive health depends on multiple interconnected biological processes. This partnership represents an important milestone in translating that scientific approach into a commercially scalable product family while maintaining our commitment to quality, consistency, and consumer confidence."

“Our goal is to establish Neuriti’i as a trusted name in comprehensive brain health supplementation. By combining carefully selected ingredients with rigorous manufacturing and quality-assurance standards, we intend to offer consumers a differentiated approach to supporting cognitive wellness throughout adulthood.”

About Vantage Nutrition LLP

Vantage Nutrition is a vertically integrated CDMO that offers strategic advisory, formulation development, and high-precision manufacturing, with a focus on advanced delivery technologies and differentiated supplement formats for efficacy-driven nutraceutical brands. Its capabilities encompass formulation development, ingredient handling, advanced capsule technologies, manufacturing, quality assurance, and commercial-scale production.

Vantage Nutrition holds FSSC 22000 Version 6 certification issued by Intertek Certification Limited, with a certified scope that specifically includes nutraceutical food and dietary supplements containing combinations of vitamins, minerals, botanicals, and herbs in liquid-filled and powder/granule-filled capsules.

About Neuriti’i Inc.

Neuriti’i Inc. is a Delaware corporation focused on the development and commercialization of innovative, neurologist-formulated, science-informed dietary supplements for brain health and cognitive support.

The company’s proprietary Neuriti’i Blue™, Neuriti’i Gold™, and Neuriti’i Copper™ formulations bring together 16 distinct nutritional ingredients across six complementary areas of brain physiology, including neuronal membrane health, cellular energy and mitochondrial function, antioxidant protection, neuronal signaling and communication, cholinergic function, and neuroplasticity-related processes.

Neuriti’i’s mission is to advance comprehensive cognitive wellness through neurologist-led formulation, scientific ingredient selection, transparent ingredient quantities, clinically relevant daily amounts where supported by published research, and high-quality manufacturing.
