

Play Movie Money Provides Purpose-Built Prop Currency for Film and Creative Productions

Play Movie Money continues to provide purpose-built prop currency for filmmakers, television producers, photographers, commercial creators and other entertainment professionals seeking practical money props for visual productions.

New York City, New York Oct 22, 2026 ([Issuewire.com](https://www.issuewire.com)) - Based in China, Play Movie Money operates as a global manufacturer and distributor of prop money, offering a range of paper-based production props in currencies including US dollars, British pounds, euros, Australian dollars, Canadian dollars and Russian rubles. The company also provides aged prop money and custom design options for productions requiring a specific visual style.

Prop currency can be an important practical element of film and video production. Scenes involving transactions, cash handling, business activity, music videos or other financial settings may require large quantities of visual currency. Using purpose-made production props can help production teams create these scenes without using genuine banknotes.

Play Movie Money focuses on producing detailed printed props suitable for on-camera use. Its products are manufactured using professional printing equipment, quality paper and production-focused inks. The company states that its prop money is designed to provide realistic visual detail while remaining different from genuine currency.

Legal and responsible use is a central part of the company's product approach. Play Movie Money states that its prop notes are not legal tender and are clearly marked for motion picture or training use. Its products are intentionally designed without certain security characteristics found on genuine banknotes, including holograms and other currency security features. The company also states that its products cannot be used as genuine money or modified to create an exact copy of real currency.

The company's product range includes individual denominations and larger quantities, allowing production teams to select options according to their project requirements. Custom printing is also available for projects that require specially designed fictional currency or other production-specific details.

In addition to film and television, prop money may be used in photography, advertising, theatrical productions, music videos, educational activities and other creative projects where visual currency is required.

With international shipping and a broad selection of currencies and designs, Play Movie Money aims to support production teams working on projects in different markets.
