Plutus Health to Sponsor Autism Investor Summit East 2026, Advancing Smarter RCM for Autism Care

Dallas, Texas Oct 13, 2026 (Issuewire.com) - *Plutus Health will sponsor Autism Investor Summit East 2026, joining autism service providers, investors, commercial and Medicaid payers, policymakers, and industry partners in Washington, DC, on November 9–10. The summit focuses on business, policy, and payment realities shaping autism services.*

As a Silver Sponsor at Booth #24, Plutus Health will bring the revenue cycle perspective to an agenda where payer dynamics, reimbursement pressure, authorization practices, operating models, and sustainable growth are central to the conversation.

Where Growth Meets Payment Reality

The 2026 agenda goes deeper into the financial pressures behind those themes, with conversations around payer relations during industry contraction, autism therapy coverage decisions, reimbursement and regulatory oversight, changing underwriting assumptions, and how CEOs are rethinking capital allocation and operating models.

For Plutus Health, those conversations create an opportunity to connect with autism care leaders around the revenue cycle factors behind sustainable growth, including:

- Payer reimbursement and collections
- Authorization and eligibility workflows
- Denial prevention and management
- Aging A/R and revenue recovery
- Revenue visibility across growing ABA organizations

What You Can Expect from Plutus Health at Booth #24

Plutus Health helps ABA organizations strengthen revenue cycle performance with specialized RCM expertise, Agentic AI, automation, and analytics.

1:1 Revenue Conversations

Meet with Plutus Health to discuss the RCM challenges affecting collections, payer performance, and operational scale.

Free RCM Assessment

Bring your numbers. Plutus Health will assess key revenue signals, including Net Collection Rate, denial trends, aging A/R, authorizations, and payer performance to identify where revenue may be getting delayed or lost.

Payer & Revenue Insights

Take a closer look at the revenue impact of payer requirements, authorization processes, denials, and reimbursement patterns, especially as AIS East examines how health plans approach coverage, utilization, and network strategy.

Agentic AI for RCM

Explore how Plutus Health combines Agentic AI with RCM expertise to reduce repetitive work, identify exceptions, and give leadership greater visibility into revenue cycle performance. For more information visit- https://www.plutushealthinc.com/
