

Suffescom Announces Verified OpenAI Partner Status, Expanding Its AI Engineering Capabilities

New York City, New York Oct 10, 2026 ([Issuewire.com](https://www.issuewire.com)) - NEW YORK, UNITED STATES, October 09, 2026 – Suffescom Solutions Inc., an engineering company specializing in [software development](#) and AI application development services, has today announced its status as an OpenAI services partner. This follows Suffescom's efforts in [AI-powered development solutions](#) and automation tools that incorporate OpenAI technologies.

Today, in almost all organizations, it is not about trying to use AI but about putting it into practice within business operations. Suffescom helps companies find out where they can use AI, design solutions according to their requirements, and incorporate them into their systems.

"A working demo is just the first step. What matters most is developing AI solutions that integrate into business processes and deliver benefits in day-to-day work. This is our primary goal at Suffescom," said Gurpreet Singh Walia, MD, Suffescom Solutions Inc.

How Suffescom Works With Clients

- **Discover:** Explore possible use cases for AI technology, measure their feasibility and impact on the business, and set goals for the project.
- **Build:** Build chatbots, AI agents, [RAG systems](#), and [generative AI solutions](#) using APIs provided by OpenAI where necessary.
- **Operate:** Manage deployed technology, measure its effectiveness, refine its output, and

improve it as required.

Experience Behind the Work

Suffescom reports having delivered more than 500 apps with AI capabilities and over 50 AI agents. With 250+ employees, its team has worked with 1250+ companies from various industries, such as healthcare, finance, manufacturing, and eLearning. This business is ISO 9001 certified and has gained recognition from different review platforms like Clutch, G2, GoodFirms, and DesignRush.

Suffescom also works with cloud platforms such as AWS and Microsoft Azure to support the deployment and operation of AI solutions in environments suited to client requirements.
