

TECHFUND's Hi AUDIT Agent Records 90.6% CyberGym Success Rate

Hi AUDIT Agent

CyberGym Success Rate

90.6%

**Higher than Mythos 5's
published CyberGym score**

Tokyo, Japan Oct 24, 2026 ([Issuewire.com](https://www.issuewire.com)) - TECHFUND, a Tokyo-based technology accelerator, announced that Hi AUDIT Agent achieved a 90.6% success rate on CyberGym, surpassing Anthropic's published Claude Mythos 5 score by 6.8 percentage points. As an AI-powered security copilot, Hi AUDIT Agent brings specialized security analysis into developers' existing workflows, helping teams move from identifying risks to reviewing potential fixes.

Integrating Security into Development Workflows

Hi AUDIT Agent is designed to help development teams incorporate security reviews into their daily work. It combines AI capabilities with specialized security knowledge and insights from security audits.

Through the Model Context Protocol (MCP), developers can connect Hi AUDIT to compatible AI coding tools and editors. They can request security analysis, examine findings in context and review proposed fixes within their existing workflows.

About TECHFUND

Founded in 2014 and headquartered in Tokyo, TECHFUND is a technology accelerator that supports entrepreneurs and corporate innovation teams. It has supported 500+ startup and entrepreneurial

teams, as well as intrapreneurs at 50+ major companies, including Nomura Holdings, SoftBank and JCB. Its core businesses include Hi STARTUP, which combines lean startup methods with agile development to help build new ventures, and Hi AUDIT, which provides security audits across fields including AI, Web3 and IoT.

About CyberGym

CyberGym is an evaluation platform developed by a research team at the University of California, Berkeley that utilizes real-world software vulnerabilities. CyberGym requires AI agents to generate working proof-of-concept tests that reproduce a specific vulnerability in a software project. The reported success rate measures performance on these benchmark tasks.
