Aeromed Group Companies NorcaTec, NAPCO International and Orlotronics Achieve CMMC Level 2 Certification

Certification reinforces cybersecurity readiness and the protection of sensitive information across U.S. aerospace and defense programs.

Charlotte, North Carolina Nov 17, 2026 (Issuewire.com) - Aeromed Group ("Aeromed") announced that **NorcaTec LLC ("NorcaTec"), NAPCO International LLC ("NAPCO"),** and **Orlotronics**, a division of NorcaTec, achieved Cybersecurity Maturity Model Certification (CMMC) Level 2 on October 19, 2026, meeting all 110 NIST SP 800-171 security requirements with no Plan of

Action and Milestones (POA&M) required.

The certification is held under NorcaTec LLC and encompasses four Commercial and Government Entity (CAGE) codes across operations in New York, Minnesota, and Pennsylvania, including NAPCO International and the Orlotronics division.

The successful assessment was conducted by ControlCase, a Certified Third-Party Assessment Organization (C3PAO). Shellproof Security, a CMMC advisory firm and Authorized C3PAO, supported NorcaTec's readiness efforts leading up to the assessment. NorcaTec continues to work with Shellproof as its virtual Chief Information Security Officer (vCISO) partner to maintain its security posture through the three-year certification period. ProActive Technology Group, NorcaTec's IT services partner, provided technical support and assisted with the implementation of IT infrastructure and security measures in preparation for certification.

Established by the U.S. Department of Defense (DoD), the CMMC program strengthens cybersecurity across the defense industrial base. Level 2 certification demonstrates the implementation of cybersecurity requirements designed to safeguard Controlled Unclassified Information (CUI).

This achievement reflects a shared commitment to maintaining rigorous cybersecurity practices, protecting sensitive defense information, and meeting the evolving security expectations of government and defense industry customers.

“Achieving CMMC Level 2 certification is a significant accomplishment for NorcaTec, NAPCO, and Orlotronics,” said Sam Gorman, President of Aeromed Americas. “Our customers rely on us not only for mission-critical products and services but also to protect the sensitive information behind the programs we support. This achievement reflects the dedication of our teams and reinforces our commitment to security, operational excellence, and serving as a trusted partner to the defense industry.”

This milestone strengthens the ability of NorcaTec, NAPCO, and Orlotronics to support aerospace and defense programs requiring CMMC Level 2 certification. As cybersecurity requirements continue to evolve, the achievement reinforces their role as trusted partners to OEMs, prime contractors and government agencies, while reflecting Aeromed Group's broader commitment to security, operational excellence and customer trust.

About NorcaTec LLC

With a history dating back to 1946, NorcaTec, located in Garden City, New York, is a global defense distribution and sustainment partner specializing in U.S.-manufactured equipment for naval, armored vehicle, and aircraft platforms. Supporting foreign military customers and OEMs in more than 60 countries, NorcaTec provides global distribution, logistics, and aftermarket services to maintain the readiness of legacy defense systems for the U.S. Government and its allies.

About NAPCO International LLC

With over 100 years of industry experience, NAPCO International, operating in Brooklyn Park, Minnesota, specializes in engineering, project management, procurement, and sustainment of U.S.-manufactured military vehicles and systems. A recipient of the U.S. President's “E” Star Award for Export Excellence, NAPCO supports OEMs and military customers worldwide through build-to-print manufacturing, vehicle resets, modernization programs, and integrated logistics solutions across tactical, armored, tracked, and amphibious vehicle platforms.

About Orlotronics

Orlotronics, a division of NorcaTec based in West Norriton, Pennsylvania, specializes in U.S. Navy program management and support. With expertise in aerospace and defense operations, Orlotronics provides dedicated program coordination and solutions supporting military requirements and mission readiness.

About Aeromed Group LLC

Aeromed is a global aerospace and defense value-added distribution partner providing integrated logistics and material management solutions to OEMs, MROs, and government customers worldwide. Through its network of specialized companies, Aeromed delivers mission-critical components, chemicals, consumables, hardware, and services that support production continuity and fleet readiness. Serving customers in more than 70 countries, Aeromed combines industry expertise, responsive support, and strategic sourcing to enhance operational efficiency and reduce risk.
