FarsiChart Ranks 50,000+ Persian Songs Daily, Launches Free Farsi Music Apps for iPhone and Android

The free Farsi Chart sorts Persian rap, pop and classic Iranian songs by real Spotify and Radio Javan plays, in English and Persian, with new releases, trending tracks, the Fars Chart and profiles of 400+ Iranian artists

Los Angeles, California Nov 3, 2026 (Issuewire.com) - **FarsiChart**, the free Persian music chart at www.FarsiChart.com, ranks more than 50,000 Persian songs and 1,000 Iranian artists every day by their real plays on Spotify and Radio Javan. It has now launched **free FarsiChart apps for iPhone and Android**, which put the same daily charts of Farsi music, Iranian singers and Persian rap on the phone, in English and in Persian.

Top Persian Songs, counted every day

Every list on FarsiChart is ranked by play counts, so the order shows what listeners play most. The **Top Persian Songs** chart covers the most played Farsi music on Spotify and Radio Javan, from the top 10 Persian songs to the top 100, and it is rebuilt every day. Trending Persian Songs follows the Iranian songs gaining plays fastest this week. New Persian Music Releases collects the latest songs from Iranian singers and rappers, and most new songs appear there within a few days of release.

Persian rap, Iranian pop and classic Persian music

Persian rap has charts of its own. The Iranian rappers chart ranks the scene's artists by their Spotify monthly listeners and Radio Javan audience, and the Persian rap songs chart ranks their tracks. Iranian

pop singers, traditional singers, female singers and Iranian music bands each get a chart too. Listeners looking for old and classic Persian songs can go decade by decade on the Iranian calendar, from the 1360s (the 1980s) to the 1400s.

Mood charts rank sad Persian songs, love songs, happy and party songs, wedding songs, workout songs and songs for the car, all by plays. Each Iranian year since 1400 has its own page of the best Persian songs of that year, and a Nowruz chart gathers the most played songs for the Iranian New Year. The Fars Chart (FarsChart) page puts the top songs, rap tracks and artists side by side. In all, FarsiChart runs more than 50 charts.

A page for every artist and every song

Every Iranian singer and rapper on FarsiChart has a profile with their Spotify monthly listeners and Radio Javan plays where available, a full list of their songs and a chart of how those numbers have moved over time. Many profiles also carry a biography in English and Persian. Every Persian song has its own page as well, with its play history on each platform, the plays it gained in the last week and month, its release date, and its rank among all Persian songs and among the artist's own work. Those pages answer questions such as which Persian song is the most played on Spotify, or which Iranian rapper has the most monthly listeners, with the latest counts.

The FarsiChart app for iPhone and Android

The iPhone app is free on the App Store and the Android app is free on Google Play. Both carry Top Persian Songs, the trending chart, new releases and every artist and song page, with search in English and Persian. Listeners can save their favorite Iranian artists and get an alert when one of them releases a new song or reaches number one.

"FarsiChart started with one goal: show which Persian songs people really listen to, counted from Spotify and Radio Javan plays and updated every day," the FarsiChart team said. "With the apps, the same charts, new releases and artist pages are now on your phone, in English or in Persian."

The rankings are set by play counts alone, and the site's About page explains how each chart is measured. FarsiChart also runs a music news feed in English and Persian about chart moves, new releases and milestones, and shares it as @FarsiChart on Instagram, Threads, Telegram and X.

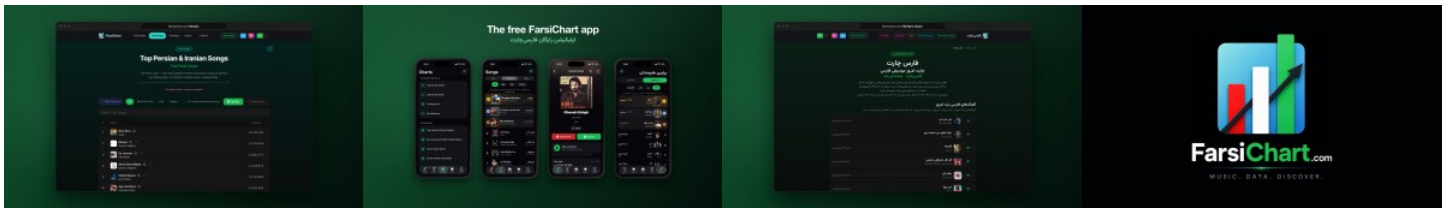

FarsiChart in Persian

FarsiChart in Persian carries the whole site in Farsi: the same daily rankings by Spotify and Radio Javan plays, with song and artist names written in Persian. Persian-speaking listeners get the top Iranian songs, the week's trending songs, new Persian songs and the charts for Persian rap, Iranian pop and traditional music in their own language, and the app supports Persian fully on iPhone and Android.

About FarsiChart

FarsiChart (also written Farsi Chart or FarsChart) is a free Persian and Iranian music chart in English and Persian. It ranks more than 28,800 Persian songs and 400 Iranian artists every day from real Spotify and Radio Javan plays, across more than 50 charts: top Persian songs, trending and new Persian music, Persian rap and Iranian rappers, Iranian pop, classic and traditional Persian music, mood charts and yearly charts. Every artist and song has its own page, and a music news feed follows the scene in both languages. The free FarsiChart app is available for iPhone and Android, and

FarsiChart is on Instagram, Threads, Telegram and X as @FarsiChart.
