Florida Broker C. Isbely Glazer Marks 20 Years as U.S. Prime Realty Expands Across Four Markets

Naples, Florida Nov 2, 2026 (Issuewire.com) - NAPLES, Fla. October 30, 2026 C. Isbely Glazer is marking 20 years in Florida real estate, celebrating a career that began in 2006 and the continued development of U.S. Prime Realty LLC, the brokerage she founded in 2008. Today, the company serves residential and commercial real estate clients across multiple Florida markets, including Miami, Hallandale Beach, Naples, Orlando, Cape Coral, and other areas throughout the state.

With a presence across these communities, U.S. Prime Realty works with buyers, sellers, property owners, and investors seeking residential properties, commercial real estate, waterfront homes, and investment opportunities. Its service areas reflect the company's broader reach across Florida's diverse property markets and the different needs of clients in each location.

Glazer's 20-year milestone offers an opportunity to reflect on a career shaped by changing market conditions, long-term client relationships, and the continued development of a real estate brokerage serving communities throughout Florida.

Serving Real Estate Clients Across Florida

Florida's real estate market offers different opportunities and considerations depending on the location and type of property. U.S. Prime Realty serves clients in Miami, Hallandale Beach, Naples, Orlando, Cape Coral, and surrounding areas, supporting a range of residential and commercial real estate needs.

Across these markets, the brokerage assists clients exploring primary residences, waterfront properties, commercial spaces, and real estate investments. Whether clients are buying, selling, or evaluating investment opportunities, property decisions can involve factors beyond the asking price.

Depending on the property and location, buyers and investors may need to consider insurance costs, flood exposure, maintenance obligations, zoning requirements, rental potential, and other long-term expenses. Waterfront properties may also require additional attention to docks, seawalls, boating access, and storm resilience.

By working across multiple Florida communities, U.S. Prime Realty supports clients as they evaluate their property objectives and the considerations associated with different markets throughout the state.

A Career Built on Client Relationships

Throughout her career, Glazer has emphasized communication, informed decision-making, and careful consideration of each client's objectives. Her approach focuses on helping clients evaluate locations, negotiate suitable prices and terms, and understand the considerations involved in buying or selling property.

Client feedback referenced in the company's original press release highlights communication and guidance throughout property transactions. Some clients have returned to the brokerage for subsequent purchases and sales, reflecting relationships that have continued beyond individual transactions.

"Reaching twenty years in Florida real estate isn't simply about longevity," said C. Isbely Glazer, founder and broker of U.S. Prime Realty. "It's about helping clients make confident decisions through changing markets while continuing to earn their trust."

Building a Brokerage Through Changing Markets

Glazer established U.S. Prime Realty in 2008 during a challenging period for the housing market, opening the company's first location in Naples, Florida. Since then, the brokerage has developed its presence across multiple Florida markets, expanding its work beyond its original location to serve clients in Miami, Hallandale Beach, Orlando, Cape Coral, and other areas throughout the state.

The experience of navigating changing market conditions has formed part of the company's history and its approach to helping clients assess property decisions. From residential purchases to commercial and investment properties, the brokerage continues to work with clients whose real estate needs vary by location, property type, and long-term objectives.

Looking Ahead

As Glazer marks two decades in Florida real estate, U.S. Prime Realty continues to serve residential and commercial clients across its Florida service areas. The milestone reflects the company's development since its founding in 2008 and its ongoing work with buyers, sellers, property owners, and investors throughout the state.

For Glazer, the anniversary represents both a look back at the industry's changes since 2006 and a continuation of the client-focused approach that has shaped her career.
