Go-Getters Concrete Launches New Baton Rouge Website, Highlighting Harry Day's 45+ Years of Experience

New website launched November 4, 2026, to help Baton Rouge homeowners and businesses explore concrete driveway, patio, slab, and foundation services.

Baton Rouge, Louisiana Nov 9, 2026 (Issuewire.com**)** - Go-Getters Concrete LLC, a Baton Rouge-based concrete contractor led by Harry Day, announced the November 4, 2026, launch of its new website, batonrougelaconcretecontractor.com.

The new website helps homeowners, property managers, and commercial clients explore concrete services, learn about project planning, and request estimates from a contractor with more than 45 years of industry experience.

The website highlights concrete driveway installation, patios, sidewalks, concrete slabs, foundations, retaining walls, stamped concrete, and other residential and commercial concrete services throughout Baton Rouge and surrounding Louisiana communities.

Bringing Decades of Concrete Experience to Baton Rouge

Harry Day brings more than 45 years of concrete industry experience to Go-Getters Concrete LLC. His background includes concrete flatwork, driveways, patios, sidewalks, curbs, steps, retaining walls, and concrete preparation for metal buildings.

The company also provides foundation forming and excavation services, along with decorative concrete options such as stamped, stained, and scored concrete.

Go-Getters Concrete LLC serves residential and commercial customers in Baton Rouge and reports a service area extending approximately 200 miles, depending on project location and availability.

Helping Property Owners Understand Concrete Construction

Beyond introducing the company's services, the new website provides educational information addressing common questions about concrete installation.

These topics include concrete PSI strength, reinforcement options such as wire mesh and fiber mesh, the purpose of control joints, and factors that influence concrete project pricing.

The website explains how project requirements, site conditions, material specifications, and preparation methods can influence the scope and cost of concrete work.

By providing this information online, Go-Getters Concrete LLC aims to help Baton Rouge property owners make more informed decisions before beginning residential or commercial concrete projects.

New Website Makes Concrete Services Easier to Explore

The November 4 website launch provides customers with a centralized resource for learning about Go-Getters Concrete LLC's services and requesting project estimates.

Visitors can explore concrete driveway installation, patio construction, decorative concrete, foundations, concrete slabs, sidewalks, and other available services.

The website also provides information about the company's experience, service area, and approach to discussing project requirements with prospective customers.

Homeowners and businesses seeking a concrete contractor in Baton Rouge can visit the new website to review available services and submit project inquiries.
