IBI Clinic and Harley Institute Merge to Expand Personalized Healthcare Services in Brookhaven, Georgia

The merger expands patient access to medical, surgical, wellness, weight management, and aesthetic services while bringing Harley Institute into IBI Clinic's growing healthcare network.

Atlanta, Georgia Nov 15, 2026 (Issuewire.com) - Harley Institute is entering a new chapter as it becomes part of IBI Clinic, bringing together two healthcare organizations with complementary services and clinical expertise. The merger expands the healthcare options available to patients in Brookhaven and the greater Atlanta area while strengthening IBI Clinic's commitment to personalized, comprehensive patient care.

Following the integration, the existing Harley Institute facility at **2678 Buford Highway NE, Atlanta, Georgia 30324**, will operate as **IBI Clinic Brookhaven**, becoming part of IBI Clinic's multi-specialty healthcare network serving communities across Georgia and Florida.

For existing Harley Institute patients, the transition builds on the foundation of care they already know while introducing access to a broader network of medical and specialty services. For new patients, it

creates additional opportunities to explore different healthcare solutions through an organization with expertise across multiple medical specialties.

Rather than simply expanding the range of services available, the merger reflects a shared opportunity to make healthcare more connected, accessible, and responsive to individual patient needs.

A SHARED VISION FOR MORE PERSONALIZED PATIENT CARE

IBI Clinic's integration of Harley Institute reflects its commitment to bringing complementary healthcare services together while maintaining a strong focus on the individual patient experience.

Through its growing network of medical clinics and surgical facilities, IBI Clinic provides patients with access to a broad range of treatment options across general medicine, surgery, weight management, plastic surgery, aesthetics, and specialized wellness services.

The addition of Harley Institute strengthens this offering by building on its established wellness and specialty services, including hormone therapy and anti-aging treatments.

Commenting on the merger, **Dr. A. Christopher Ibikunle, MD, Executive Chairman of IBI Clinic**, said:

"Our vision has always been to make quality healthcare more accessible while ensuring that every patient feels heard, valued, and supported throughout their care journey. Bringing Harley Institute into the IBI Clinic family allows us to build on an established foundation and offer patients access to a broader range of healthcare services and expertise. We believe healthcare should be both comprehensive and personal, and this integration gives us another opportunity to deliver that experience while continuing to invest in the communities we serve."

EXPANDED HEALTHCARE SERVICES FOR BROOKHAVEN PATIENTS

With Harley Institute joining the IBI Clinic network, patients at the Brookhaven facility will have access to an expanded range of healthcare options, building on the location's established wellness and specialty services.

Services associated with the Brookhaven location include:

- **Medical and Surgical Care:** General medical services, general surgical consultations, and access to specialized surgical treatment options.
- **Weight Management:** Medical weight management programs and access to IBI Clinic's broader bariatric and surgical weight loss expertise.
- **Men's and Women's Wellness:** Personalized wellness services, hormone replacement therapy, and other specialty treatment options.
- **Anti-Aging and Regenerative Medicine:** Wellness, rejuvenation, and regenerative treatment options.
- **Aesthetic Services:** Non-surgical aesthetic treatments and other personalized rejuvenation options.

Beyond Brookhaven, patients can also explore IBI Clinic's wider network of specialties, which includes plastic surgery, advanced laser procedures, bariatric surgery, hernia treatment, gastrointestinal and reflux care, and other specialized surgical services. Availability varies by location and individual

treatment requirements.

Patients can learn more about IBI Clinic's medical and surgical procedures and locations across Georgia.

WHAT THE TRANSITION MEANS FOR EXISTING HARLEY INSTITUTE PATIENTS

IBI Clinic recognizes that continuity and familiarity are important when patients have an established relationship with a healthcare provider.

The transition to IBI Clinic Brookhaven builds on the existing Harley Institute facility and its established services while introducing the resources and broader specialty network of IBI Clinic.

Existing patients can continue reaching out to the Brookhaven location for appointment information, available services, and assistance navigating the transition. Patients seeking specific treatments will be guided on the appropriate services and locations within the IBI Clinic network.

For new patients, the Brookhaven facility offers another convenient point of access to IBI Clinic's expanding healthcare network, with opportunities to explore personalized treatment options based on their individual needs.

The goal is to make the experience of finding and accessing appropriate care more straightforward, with a focus on patient communication, individualized attention, and support throughout the treatment process.

INTRODUCING THE EXPANDED IBI CLINIC BROOKHAVEN

As part of its continued commitment to the Brookhaven community, IBI Clinic will host a community open house on **November 20, 2026**, offering residents an opportunity to visit the facility, meet members of the team, and learn more about the services available. RSVP

The event will provide an introduction to IBI Clinic Brookhaven and the expanded healthcare options now available through the organization.

However, the merger represents a long-term commitment to serving the community beyond this introductory event. IBI Clinic looks forward to welcoming existing Harley Institute patients, new patients, and families seeking access to a broader range of healthcare services.

ABOUT IBI CLINIC

IBI Clinic is a multi-specialty healthcare organization operating medical clinics, specialty treatment centers, and outpatient surgical facilities across Georgia and Florida.

Its healthcare services span general medicine, general surgery, bariatric and medical weight loss, plastic surgery, medical aesthetics, advanced laser procedures, hernia treatment, gastrointestinal and reflux care, men's and women's wellness, and other specialized treatments.

Through its growing network of healthcare facilities, IBI Clinic brings together medical expertise, advanced treatment options, and multiple specialties to help patients navigate their healthcare needs with greater convenience.

Led by an experienced team of healthcare professionals, including **Dr. A. Christopher Ibikunle, MD, Executive Chairman**, IBI Clinic continues to invest in its clinical capabilities, facilities, and patient experience as it expands its presence across the Southeast.
