Mindcolor Autism Offers ABA Therapy for San Antonio Families at Its Culebra Road Center

The San Antonio center provides applied behavior analysis, autism evaluations and screening for children ages 2 to 13.

San Antonio, Texas Nov 12, 2026 (Issuewire.com**)** - Mindcolor Autism is highlighting the ABA therapy services available at its San Antonio center at 8507 Culebra Rd, Suite 101. The center works with children ages 2 to 13 and serves families from San Antonio, Helotes, Leon Valley, Lackland and nearby communities.

Applied behavior analysis (ABA) therapy uses individualized goals to help children build communication, social and daily living skills. At the San Antonio center, sessions for younger children are play-based. School-age children work on goals such as holding a conversation and making friends. Board Certified Behavior Analysts (BCBAs) at this location average eight or fewer clients each, which gives families more time with the clinician who guides their child's plan.

Along with ABA therapy, Mindcolor Autism offers diagnostic autism evaluations, M-CHAT-R autism screening, specialized programs and referrals. The intake team confirms eligibility and checks whether the center is in-network with each family's insurance before therapy begins. The San Antonio center accepts most commercial plans as well as TRICARE.

For parents who are unsure where to begin, the M-CHAT-R is a short screening questionnaire for toddlers between 16 and 30 months old. A positive screen can lead to a diagnostic evaluation, and a diagnosis is often the first step toward insurance approval for ABA therapy. Mindcolor Autism can help families with each of these steps from one place.

The center is open Monday through Friday from 8:00 am to 6:00 pm. Families can get directions and read reviews for Mindcolor Autism San Antonio on Google Maps, and they can learn more about ABA

therapy in San Antonio on the Mindcolor Autism website.
