PitchMyAI Unifies Website SEO and Social Media Audits into a Single Automated Platform

Speed, Health, and AI-Agent Readiness audits for websites, plus Page and Post audits for LinkedIn, Facebook, and Instagram, each with a scored report and ranked fix list in under five minutes.

Topeka, Kansas Nov 20, 2026 (Issuewire.com) - Sematic Tech LLC (www.sematictech.com) today announced the launch of PitchMyAI (www.pitchmyai.com), a digital audit platform that analyzes both a business's website and its social media presence. The platform offers three website audits, covering Speed, Health, and AI-Agent Readiness, along with Page and Post audits for LinkedIn, Facebook, and Instagram. Users enter a URL and receive a scored report with recommendations ranked by impact and effort, typically in under five minutes.

Most audit tools stop at page speed. PitchMyAI is built on the view that a brand's visibility depends on the whole picture: how fast its site loads, how healthy it is technically, how ready it is to turn visitors into leads, and how its pages and posts perform on social platforms. Each audit is a separate module with its own report, so teams can start with the area that worries them most.

“Most tools tell you what is broken. They don’t tell you what to fix first or why it matters to the business,” said Dipesh Bhattarai, founder of Sematic Tech LLC. “We built PitchMyAI so anyone with/without technical knowledge can run an audit, understand the result, and hand a clear to-do list to their team.”

Website Audits

- **Speed Audit:** Tests desktop and mobile performance separately and reports Core Web Vitals, including First Contentful Paint, Largest Contentful Paint, Total Blocking Time, Cumulative Layout Shift, and Speed Index. A desktop-versus-mobile gap analysis shows where visitors are slowed down.

- **Health Audit:** A technical checkup covering HTTP behavior, SSL/TLS, DNS, browser security headers, metadata, and page weight. Each category is graded, with developer-level fix steps.
- **AI-Agent Audit:** Reviews how ready a site is for both machines and buyers. It checks structure and structured data, calls to action, analytics, and whether visitors can contact the business by form, phone, email, or chat. It returns an opportunity score and ranks the next steps.

Social Media Audits

PitchMyAI also audits a brand's presence on LinkedIn, Facebook, and Instagram, with a Page Audit and a Post Audit for each platform.

- **Page Audit:** Evaluates a company's page, including profile completeness, audience signals, engagement patterns, and how consistently the brand presents itself across platforms.
- **Post Audit:** Evaluates page post content and engagement. It analyzes engagement and market trends from the last 14 days to give timely recommendations. If an account posts infrequently, the audit evaluates its seven most recent posts instead. It reviews posting frequency, content structure, opening hooks, clarity, tone, calls to action, and hashtag use, and shows which posts drive reach and which hold it back.

Built for Action

Every report includes an overall score out of 10, an executive summary in plain language, a business-impact explanation, metric-level findings, and prioritized recommendations with impact and effort ratings. Reports can be downloaded as PDFs for sharing with clients or developers. A Run History panel keeps past audits available so users can re-run after making changes. Audits that fail to complete do not use a credit.

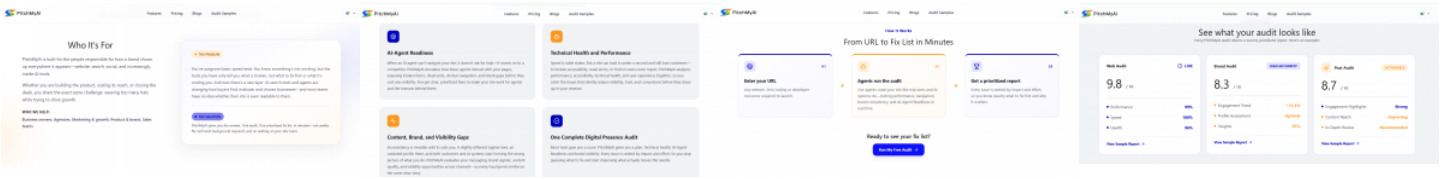

Pricing and Availability

PitchMyAI is available now. The Free plan includes 3 audit credits per month with no credit card required. Paid plans are Starter at $9.99 per month (12 credits), Growth at $19.99 per month (36 credits), and Scale at $29.99 per month (60 credits), with savings of up to 30% on yearly billing. All plans include website, page, and post audits.

PitchMyAI is designed for business owners, agencies, marketing and growth teams, product and brand teams, and sales teams. To run a free audit or view sample reports, visit https://www.pitchmyai.com.

About PitchMyAI
