RIBA Roofing & Exteriors Highlights Full-Service Roofing and Storm Damage Solutions in Fairfax, VA

Family-owned Virginia Class A contractor provides roofing, windows, siding, and exterior restoration services for homeowners facing everything from minor repairs to major property damage.

Fairfax, Virginia Nov 9, 2026 (Issuewire.com) - RIBA Roofing & Exteriors, a family-owned roofing and exterior construction company serving Fairfax and Northern Virginia, is highlighting its comprehensive services for homeowners facing roof deterioration, severe storm damage, fallen-tree impacts, and major exterior renovation needs.

Operating as RIBA Construction LLC, the company lists Virginia Class A Contractor License #2705159205 and provides residential and commercial roofing, window replacement, siding installation, exterior doors, skylights, and related construction services.

From replacing damaged shingles to coordinating extensive roofing and exterior repairs, RIBA helps homeowners understand their options and develop a project scope based on the condition of their property.

From Fallen-Tree Damage to Complete Roof Replacement

Storm damage can affect far more than the visible roofing surface. When a tree strikes a home, the impact may damage shingles, roof decking, framing, gutters, siding, windows, and surrounding exterior components.

RIBA Roofing & Exteriors provides roof inspections, storm damage assessments, localized repairs, and complete roof replacements. The company can evaluate extensive damage and help determine which roofing and exterior components require repair or replacement.

For homeowners facing severe damage, the process begins with understanding the affected areas, documenting visible conditions, and identifying the work required to restore the property.

RIBA also provides insurance claim documentation support, helping homeowners organize information about storm-related damage. Insurance coverage and claim approval remain subject to the homeowner's policy and insurer.

Roofing Expertise Across Multiple Materials and Systems

RIBA works with asphalt shingles, architectural roofing products, metal roofing, cedar shingles, slate, and flat roofing systems.

Its roofing services also include skylight installation and replacement, chimney-related repairs, flashing work, and roof ventilation considerations.

Whether a homeowner needs a small roof repair or a complete roofing system replacement, the company emphasizes inspections, clear explanations, appropriate materials, and written project scopes.

More Than Roofing: Windows, Siding, Doors, and Exterior Improvements

One of RIBA's distinguishing capabilities is its range of exterior construction services.

In addition to roofing, the company provides replacement windows, vinyl and fiber cement siding, exterior doors, skylights, gutters, exterior trim, and deck-related construction services.

This broader service offering can benefit homeowners whose properties require multiple improvements at once.

For example, a published customer review describes a RIBA project involving a new roof, siding, and 25 replacement windows. Such projects illustrate how roofing and exterior improvements can be coordinated within a broader home renovation.

Family-Owned Company With Engineering Experience

RIBA Construction was established by husband-and-wife team Richard and Basia Ridley.

According to the company's website, Richard has a background in mechanical engineering and finance, while Basia has a background in chemical engineering.

The company emphasizes clear communication, project planning, customer relationships, and workmanship.

RIBA also identifies itself as a GAF Master Elite roofing contractor and provides information about available roofing systems and warranty options.

Helping Fairfax Homeowners Make Informed Decisions

RIBA encourages homeowners to have roofing problems professionally assessed before deciding between repair and replacement.

A roof leak does not always require an entirely new roof. However, widespread damage, aging materials, repeated leaks, or serious storm impacts may make a complete replacement the more appropriate option.

The company provides consultations to discuss project conditions, roofing materials, written estimates, and available repair or replacement options.

Homeowners seeking roofing, window installation, siding replacement, or exterior construction services in Fairfax can learn more at ribaconstruction.com.
