# Tampa Web Design Agency Dominate Solutions Launches Websites for a Screen Contractor, Family Photographer and Executive

**Three very different clients with three very different goals. The agency's latest launches show why it builds every website around what the business actually needs it to do.**

**Tampa, Florida Nov 20, 2026 (Issuewire.com)** - Tampa web design agency Dominate Solutions today shared three recent website launches for clients that, on paper, have almost nothing in common: a screen enclosure contractor, a family portrait studio, and a veteran public-company executive. What connects them is how each site was built. Rather than starting from a template, the New Tampa agency, which has launched more than 500 websites and holds a 5.0 rating across 108 Google reviews, begins every project by asking what the website needs to accomplish for the business, then designs every page around that answer.

For Tampa Screen Repair, the answer was simple: make the phone ring. The screen-only contractor rescreens pool cages, lanais, patios, windows, and screen doors, and its customers usually want one thing: a fast and fair estimate. Dominate Solutions built a 36-page lead-generation site covering seven core services and 16 service areas across Hillsborough and Pasco counties, from South Tampa and Carrollwood to Brandon, Riverview, Lutz and Wesley Chapel. Honest price ranges appear up front, an interactive guide helps homeowners compare mesh options, and a before-and-after slider and neighborhood galleries show real local work. Click-to-call buttons and a short quote form, which even includes a "not sure, need an inspection" option, keep the path from search result to estimate as short as possible.

Tampa family photographer Mallary Denson needed something different. Parents choosing a photographer are deciding whom to trust with their family, so Denson's New Tampa studio, Captured by Mallary Photography, rated 5.0 across 143 Google reviews, needed a site that builds confidence before anyone books. At https://tampafamilyphotographer.com, Dominate Solutions built a site devoted entirely to family portraits. It lays out four session types (studio, outdoor sessions at Tampa Bay parks and beaches, extended family, and seasonal holiday portraits) and walks parents through exactly what to expect, from a planning call and styling guide to online booking and gallery delivery. The site serves families across Hillsborough, Pinellas, Pasco, Hernando, and Polk counties.

The third project served a different audience altogether. Entrepreneur, investor, and author Martin Sumichrast has spent more than 35 years building companies in finance, consumer products, wellness, and technology. He co-founded cbdMD, serving as its chairman and CEO from 2015 to 2023, and today serves as Chairman of the Board of Hawkeye Digital, Inc. His new personal authority site brings that record together in one place, from his career timeline, books and speaking events to his travel, marathon running and youth mentorship. Journalists, investors and event organizers can now find a complete, current picture of his work in a single visit.

"Every page we build has a job description," said Nate D, founder of Dominate Solutions. "A screen contractor needs the phone to ring this week. A photographer needs a parent to feel confident enough to book. An executive needs a journalist or a board to find the full story in one place. Those are three different jobs, so they're three different websites. That's why we never sell templates, and why our clients keep coming back."
