This Holiday Season, Help Bring Healthier Smiles to Children in Haiti

Sharp Dentistry & Associates has supported the dental clinic at St. Damien Pediatric Hospital since 2009, helping expand access to essential oral healthcare

Miami, Florida Nov 17, 2026 (Issuewire.com**)** - Every child deserves the chance to grow up with a

healthy smile. For children in Haiti, access to dental care can be difficult to find. This holiday season, as families and communities look for meaningful ways to give back, Sharp Dentistry & Associates of Miami, Florida, is inviting others to make a difference through its longstanding partnership with St. Damien Pediatric Hospital in Haiti.

Since 2009, Sharp Dentistry & Associates has supported St. Damien and its dental clinic, helping provide essential dental supplies and engaging vendor partners to meet the clinic's ongoing needs. This commitment helps the hospital deliver vital oral healthcare to children and families who might otherwise go without treatment.

In 2025 alone, St. Damien's dental clinic provided 3,395 dental services, including preventive care, cleanings, fillings, root canals, X-rays, extractions, and minor oral surgery. These services help address immediate dental concerns while supporting better long-term health and well-being.

"Access to dental care is about so much more than a healthy smile. It's about health, dignity, and giving the children of NPH Haiti and St. Damien Pediatric Hospital the confidence to shine," said Dr. Bruno Sharp. Amy Meinert of NPH USA added, "Partnerships like the one with Sharp Dentistry & Associates help make this care possible for children and families in Haiti."

Located in Haiti, St. Damien Pediatric Hospital is dedicated to caring for children and high-risk mothers. As the country faces significant healthcare challenges, the hospital provides critical medical services to families while working to strengthen healthcare in Haiti. Supporters like Sharp Dentistry & Associates help sustain specialized services that might otherwise be out of reach for many patients.

Sharp Dentistry & Associates demonstrates how dental professionals, their industry partners and patients can make a meaningful difference beyond their own communities. By helping connect the hospital with needed supplies and resources, the Miami practice continues to play a role in bringing healthier smiles to children in Haiti.

This holiday season, Sharp Dentistry & Associates invites you to join them in giving the gift of a healthy smile. Throughout November and December, the practice is raising funds to support St. Damien's dental clinic. Every contribution helps provide essential dental care for children and families in Haiti. As you consider where to direct your holiday generosity, consider making a gift that can help a child receive the care they need and deserve.

About St. Damien Pediatric Hospital

Nuestros Pequeños Hermanos (NPH) USA supports St. Damien Pediatric Hospital in Haiti through fundraising, awareness, and engagement with supporters across the United States. For more than 70 years, NPH has worked to improve the lives of vulnerable children and families throughout Latin America and the Caribbean. Through NPH USA, supporters can help sustain St. Damien's dental clinic and other essential hospital services, bringing children in Haiti closer to the healthy futures they deserve. St. Damien Pediatric Hospital provides specialized care for children and high-risk mothers, including emergency and inpatient care, maternity services, pediatric oncology, and dental care. The hospital serves families facing significant barriers to accessing quality healthcare.
