VIRTUAL VFX - ZANE DEEP WORLD METAVERSE - PROFESSIONAL STUNT - NOT REAL - FICTIONAL MOVIE SET

Las Vegas, Nevada Nov 12, 2026 (Issuewire.com) - ZANE DEEP WORLD, the 9-games-in-one browser-based motocross metaverse created by Las Vegas-based creator Zane Deep, also known as AlphaCloudGod, is reaching new viral levels after a hands-on creative collaboration with Meta AI.

Built around the MX Championship Las Vegas night stadium, ZANE DEEP WORLD has surged to over 303,787 views in 14 days on Instagram, with a +604.6% increase on Snapchat Spotlight (49,698 views in 7 days, 37,064 viewers, 2,179 favorites +600%, 117 shares +875%). The breakout rivalry of RED 94 vs BLUE 88 has driven thousands of comments, reposts, and the viral cliffhanger "Feet Over The Bars" — 29K plays, 1.3K likes, 398 comments.

Unlike standard AI video generation, Zane Deep built the universe first. ZANE DEEP WORLD features BSA-grounded pump track physics (100' x 50', 2ft rollers, clay loam, 3% slope, French drains), Brooklyn Bridge Park structural grounding, and a fully branded world with graffiti tags ZANE DEEP WORLD, ZANE DEEP, EVIL JAY, AlphaCloudGod, and Geeked Out Labs.

"Anyone can come to Meta AI and get a good video," says Zane Deep, creator of ZANE DEEP WORLD. "But they won't get a GREAT video because they never created a metaverse. I built the world first. Meta AI helped me bring my world to life — major FX stunt videos, 300mph, volcanoes erupting, meteor showers raining, Indominus Rex chasing — all as VIRTUAL VFX. We survive every time. That's why it hits different."

Working hands-on with Meta AI, Zane Deep has expanded ZANE DEEP WORLD into a cinematic, end-of-the-world FX saga — 9:16 vertical, super realistic, mid-scene 100mph starts, chant "ZANE DEEP ZANE DEEP" from frame one, massive 100ft-150ft lava pit jumps over erupting volcanoes and meteor impacts, with T-Rex, Spinosaurus, and Indominus Rex chasing at close range but never making contact. All content is labeled: VIRTUAL VFX - ZANE DEEP WORLD METAVERSE - PROFESSIONAL STUNT - NOT REAL - DO NOT ATTEMPT - FICTIONAL MOVIE SET - DINOSAURS VFX - NO ANIMALS HARMED - END OF WORLD VFX - SURVIVE EVERY TIME.

ZANE DEEP WORLD is available now as a multiplayer browser-based experience, with plans to expand from metaverse to IRL Las Vegas stadium events.
